Eucalyptus essential oil is extracted from Eucalyptus, a wide genus of flowering trees and shrubs, via steam distillation. Eucalyptus oil is a clear or pale yellow liquid. It has an aromatic and camphoraceous odor, as well as a strong, camphoraceous flavor and a chilly sensation. Cineole

must make up at least 70.0 percent of the product. It is native to Australia, while some of its species can also be found in New Guinea and Indonesia. The Eucalyptus globulus, an evergreen tree that is one of Australia's most frequently farmed species, is one of the main sources of eucalyptus essential oil. This tree is used in various industries which drives the eucalyptus oil market.

Antiseptic and anti-fungal capabilities are two of the most important features of Eucalyptus essential oil. The mosquito repellent properties of eucalyptus essential oil are well-known. The extraction of eucalyptus essential oil has a potent synergistic impact that can be linked to the greatest level of cineole, which is 80-95 percent higher than any other plant or herb. The eucalyptus essential oil has a wide range of uses in a variety of industries. Such uses has led to the overall growth of eucalyptus oil industry.

Based on application, the food & beverages segment accounted for the largest market share in 2020, contributing nearly two-fifths of the global eucalyptus oil market share, and will continue with its dominant status by 2030. However, the aromatherapy segment is set to register the highest growth with CAGR of about 7.3% from 2021 to 2030.

Based on distribution channel, the hypermarkets/supermarkets segment contributed to the largest market share in 2020, accounting about half of the global eucalyptus oil market share, and will continue with its domination by 2030. Nevertheless, the online channels segment is set to register the largest growth with CAGR of 8.4% from 2021 to 2030.

Based on region, North America contributed towards the highest market share in 2020, accounting for nearly two-fifths of the global eucalyptus oil market, and is projected to maintain domination till 2030. Nonetheless, the Asia-Pacific eucalyptus oil market is set to record the fastest CAGR of 8.0% during forecast timeline.
