Edible Vaccine Global Market Report 2024 - Market Size, Trends, And Global Forecast 2024-2033

In recent years, the edible vaccine market size has seen robust growth, and it is predicted to ascend from \$8.04 billion in 2023 to \$8.77 billion in 2024, reflecting a compound annual growth rate CAGR of 9.1%. This expansion during the historical period can largely be attributed to advancements in genetic engineering, difficulties faced with traditional vaccines, developments in biopharming, an increased emphasis on worldwide immunization, and ramped up funding and backing from governments. But what does this mean for the future of the edible vaccine market?

“

The edible vaccine market size is expected to see strong growth in the next few years. It will grow to \$12.50 billion in 2028 at a compound annual growth rate (CAGR) of 9.2%.”

Watch out for the sweeping prevalence of digestive disorders, which is expected to turbocharge the growth of the effervescent and chewing tablet market going forward. The intensifying prevalence of these digestive anomalies is fired up by factors such as poor diets, high-stress levels, inactive lifestyles, too much dependence on medications, and escalating consumption of processed foods. Effervescent and chewing tablets, which provide speedy relief for digestive disorders such as indigestion, bloating, and heartburn, are increasingly becoming the go-to solution for managing mild gastrointestinal discomfort.
