

Disposable Medical Sensors Market To booming in future

PORTLAND, FL, UNITED STATES, November 27, 2024 / EINPresswire.com/ -- <u>Disposable</u> <u>medical sensors</u> are used in healthcare sector as pressure detectors, temperature sensors, image sensors, and others. These sensors aid in accurate monitoring, treatment, and diagnosis of a disease. Furthermore, they sensors play a significant role in making a medical device more safe and effective, while simplifying their operation.

The advent of disposable sensors and biosensors has played a vital role in the evolution of sensors in healthcare. Hence, the disposable medical sensors are a preferred option among patients and healthcare professionals for easy detection of diseases. In this regard, many key players develop and commercialize novel sensors. For instance, in September 2016, Abbott received approval for its FreeStyle Libre Pro system, a continuous glucose monitoring (CGM) system.

The global disposable medical sensors market is segmented based on product type, placement type, application, and end user. Based on product type the market is segmented into biosensor, temperature sensor, pressure sensor, humidity sensor, force sensor, image sensor, and others. By placement type, the market is divided into wearable sensors, invasive sensors, implantable sensors, ingestible sensors, and strip sensors. Based on application, the market is categorized into patient monitoring, diagnostics, and therapeutics.

Patient monitoring is further segmented into continuous blood pressure monitoring, implantable loop recorder, cardiac monitoring electrode, pulse oximeters, smart pills, continuous blood glucose monitoring (CGM), and others. Diagnostics application is further classified to capsule endoscopes, HIV test strip sensors, pregnancy test strip sensors, drug and alcohol test strip sensors, and blood glucose test strip sensors. The therapeutics application is segmented into insulin pump sensors, cardiac therapeutic electrode sensors, and cardiac catheter sensors. Based on end user, the market is divided into hospitals, clinics, diagnostic laboratories, and home care. Among product type, biosensor segment occupied dominant share of three sevenths of the total market in 2016, and is expected maintain this trend during the forecast period, owing to its high adoption globally. In the placement type segment, the ingestible sensor is expected to grow with highest CAGR of 11.0% during the forecast period.

Comprehensive competitive analysis and profiles of major market players, such as

The key players in the global disposable medical sensors market include Philips Healthcare, Sensirion AG Medtronic plc, Honeywell International, Inc., Smiths Group plc (Smiths Medical), STMicroelectronics, Omnivision Technologies, Inc., TE Connectivity (TE), First Sensor, and Ambu A/S. The other prominent players in the value chain include MEMSIC, Inc., Universal Biosensors, Inc., Biosensors International Group, and GeekWire, LLC.

FREQUENTLY ASKED QUESTIONS?

Q1. What is the market value of Disposable Medical Sensors Market report in forecast period?

Q2. What would be forecast period in the market report?

Q3. What is the market value of Disposable Medical Sensors Market in 2020?

Q4. Which is base year calculated in the Disposable Medical Sensors Market report?

Q5. Does the Disposable Medical Sensors Market company is profiled in the report?

Q6. Which are the top companies hold the market share in Disposable Medical Sensors Market?

Q7. Does the Disposable Medical Sensors Market report provides Value Chain Analysis?

Q8. What are the key trends in the Disposable Medical Sensors Market report?

About Allied Market Research:

Allied Market Research (AMR) is a full-service market research and business-consulting wing of Allied Analytics LLP based in Wilmington, Delaware. Allied Market Research provides global enterprises as well as medium and small businesses with unmatched quality of "Market Research Reports" and "Business Intelligence Solutions." AMR has a targeted view to provide business insights and consulting to assist its clients to make strategic business decisions and achieve sustainable growth in their respective market domains. AMR offers its services across 11 industry verticals including Life Sciences, Consumer Goods, Materials & Chemicals, Construction & Manufacturing, Food & Beverages, Energy & Power, Semiconductor & Electronics, Automotive & Transportation, ICT & Media, Aerospace & Defense, and BFSI.

We are in professional corporate relations with various companies and this helps us in digging out market data that helps us generate accurate research data tables and confirms utmost accuracy in our market forecasting. Allied Market Research CEO Pawan Kumar is instrumental in inspiring and encouraging everyone associated with the company to maintain high quality of data and help clients in every way possible to achieve success. Each and every data presented in the reports published by us is extracted through primary interviews with top officials from leading companies of domain concerned. Our secondary data procurement methodology includes deep online and offline research and discussion with knowledgeable professionals and analysts in the industry.
