

# Gluten-Free Products Market Expected to Collect \$7.5 Billion: Revenue, Demand, Share, Size, Industry Analysis

*global gluten-free products market generated \$4.3 billion in 2019, and is estimated to reach \$7.5 billion by 2027, registering a CAGR of 7.2% from 2020 to 2027*

WILMINGTON, DE, UNITED STATES,  
November 28, 2024 /

EINPresswire.com/ -- The global gluten-free products consumption has been on the rise marking a positive trend on bakery and ready meals global trend, which is attributable to the rise in awareness about various health benefits associated with the consumption of gluten-free products. North America and Europe has witnessed higher concentration of gluten-free food products consumption.

Gluten-free products are generally more expensive than the regular food products containing wheat ingredients. This is attributable to the additional costs incurred on developing gluten-free food products. According to the Gluten-Intolerance Group of North America, celiac shoppers estimated that up to 30% of their entire monthly grocery bill was spent on gluten-free products. Consumers with gluten intolerance are expected to have less preference over gluten-free food products due to high pricing of these products.
