The global marketing technology market is experiencing growth due to several factors, including the increasing digital transformation, the surge in demand for personalized experience, and the proliferation of automation and efficiency. However, data privacy and compliance, and the high cost of implementation are expected to hamper market growth. Furthermore, the growing integration of AI and ML technologies and the increase in demand for real-time marketing are anticipated to provide lucrative growth opportunities for the global marketing technology market in the upcoming years.

Marketing technology provides several benefits in various industries, reducing operational costs, increasing efficiency and accuracy, and improving customer experience. In the retail and e-
