What Future Growth is Projected for the Acute Ischemic Stroke Therapeutics Market?

Looking ahead, the acute ischemic stroke therapeutics market size is forecasted to enjoy strong growth, rising to \$13.17 billion in 2028 at a CAGR of 9.3%. Driving this predicted growth are an increase in preference for online pharmacies, rise in cardiovascular diseases, growing cholesterol

levels, and greater occurrence of diseases and ischemic stroke. At the same time, major advancements in medical technology, the incorporation of artificial intelligence and machine learning, developments in neurology, and the uptake of technologically advanced diagnostics will further shape market trends.

What are the Market Drivers for Acute Ischemic Stroke Therapeutics?

Hypertension, in particular, is seen as a significant factor propelling the growth of the acute ischemic stroke therapeutics market going forward. Hypertension, also known as high blood pressure, elevates the force of blood against artery walls which in turn heightens the risk of heart disease, stroke, and other health disorders. Hypertension prevalence is driven primarily by an aging population and escalating obesity rates. To manage hypertension, acute ischemic stroke therapeutics address complications arising from stroke and prevent further damage to cerebrovascular functions, which are often linked to high blood pressure.
