Advanced Life Support (ALS) Training Manikins Global Market Report 2024 - Market Size, Trends, And Global Forecast 2024-2033

The ALS training manikins market has witnessed robust growth in recent years and is forecasted to grow from \$1.23 billion in 2023 to \$1.32 billion in 2024, reporting a compound annual growth rate CAGR of 7.3%. This growth in the historical period can be attributed to the rise in global

healthcare spending, increase in the number of healthcare training institutions, increase in the incidence of trauma, growth in public awareness campaigns, and burgeoning government support for such initiatives.

“

The advanced life support training (ALS) manikins market size is expected to see growth in the next few years. It will grow to \$1.77 billion in 2028 at a compound annual growth rate (CAGR) of 7.6%. ”

Protuberant Trends And Driving Factors: How Are Cardiac Emergencies Establishing The Need For ALS Manikins?

The rise in cardiac emergencies is catalyzing the growth of the ALS Training Manikins market. Cardiac emergencies involve urgent medical conditions related to the heart such as heart attacks, sudden cardiac arrest or severe arrhythmias, where immediate intervention is critical to prevent death or severe complications. Factors contributing to the rise in cardiac emergencies include obesity, hypertension, diabetes, poor diet, lack of exercise, and smoking. ALS Training Manikins have been pivotal in preparing healthcare professionals for such emergencies by simulating authentic scenarios for practicing critical skills such as cardiopulmonary resuscitation CPR, defibrillation, and advanced cardiac life support techniques.
