Based on organization size, the large enterprise segment held the highest market share in 2021, accounting for nearly two-thirds of the global massive IoT market revenue, and is estimated to maintain its leadership status throughout the forecast period, as most of the large enterprises are responsive toward taking security measures such as regular software updates, strong authentication, and risk assessment. However, the SMEs segment is projected to manifest the highest CAGR of 23.8% from 2022 to 2031, as there is a rise in focus on recognizing the importance of IT technologies.
