

YouTube Series Counts Down to Final Cooking Show - #92 Uranium

Table for 92 will air episodes every day in December until the last episode #92 Uranium airs on December 31st.

LEBANON, NJ, UNITED STATES, December 4, 2024 /EINPresswire.com/ -- Archaeologist Thor Giese recently completed filming his YouTube science and cooking series, Table for 92 – Cooking Through the [Periodic Table of Elements](#)®. Each episode features a mashup of science, food and history into a cooking illustration. For the month of December, one show per day will be posted on YouTube until December 31st when the last show, #92 Uranium, is scheduled to air.

Thor Giese films one of the 92 episodes of Table for 92 - Cooking Through the Periodic Table of Elements®

So, what happens when you get to #92 Uranium, an element you don't really want to cook with? You whip up a New Mexico Hatch Green Chile in honor of The Manhattan Project and Robert

“

The series is my love letter to science and the people who created the modern periodic table. Their discoveries have contributed to our lives today in ways that they could never have imagined.”

Thor Giese

Oppenheimer. As the story goes...Oppenheimer and friends would eat cheeseburgers smothered in Hatch Green Chile at The Owl Bar & Café, located 30 minutes from the Trinity Testing Site.

“The periodic table contains all the fields of science, along with history, sociology, language and culture,” Giese said. “Science helps make sense of the world, and the fundamental order of the universe can be explained in the periodic table. Table for 92 is an interactive way to understand the elements and have a great time.”

Giese said most people don't think regularly about the periodic table, but the elements inform everything around us all the time. A mobile phone, he said, for example, is made up of over 50

elements. "Understanding and appreciating the table is like understanding and appreciating life better."

Before completing the full series, Giese, also an avid hunter, fisherman, forager and gardener, had already gained recognition for his work. In 2020, Giese first developed experiential science videos called, Thor's Outdoor Science Academy®. The series was picked up by the Emmy-winning Into the Outdoors network, which aired on PBS in 27 states, plus Washington, D.C., and Puerto Rico. For Table for 92, Giese has earned multiple Telly Awards, including the latest being two bronze awards in the categories of Science & Technology and Food & Beverage in 2023. The Table for 92 series is currently in talks with national production companies interested in getting the series on networks and streaming services.

"The series is my love letter to science and the people who created the modern periodic table," Giese said. "Their discoveries and research have contributed to our ability to live good lives today in ways that they could never have imagined. It's like planting a fruit tree that you'll never enjoy yourself."

About Thor Giese & Thor's Outdoor Science Academy®

With a degree in anthropology from the University of Colorado in Denver, Giese worked as an archaeologist on numerous digs and excavation sites, as well as served as a resident educator at Dinosaur Ridge, an outdoor museum in Colorado known as one of the world's most famous dinosaur fossil localities. Easily educating over 200,000 museum guests in his time, Giese learned how to make science come alive and connect with others.
