The Dallas Rhinoplasty Meeting is one of the most prolific and impactful educational experiences for surgeons studying rhinoplasty."

Rod J. Rohrich, MD

Dr. Rod J. Rohrich, will be hosting the 42nd annual Dallas Rhinoplasty Meeting, taking place from February 28th through March 2nd, 2025. This three-day program is dedicated to the advancement of safe and consistent results in rhinoplasty and is known to bring rhinoplasty experts from around the world.

The Dallas Rhinoplasty Meeting is the global leader in rhinoplasty educational venues having taught the art and science of rhinoplasty to over 20,000 plastic surgeons and

facial plastic surgeons globally. The Meeting covers a wide range of basic and advanced rhinoplasty topics from the fundamentals of nasal anatomy to diagnosing common and uncommon rhinoplasty problems as well as the development of individualized operative plans for ethnic, complex [revision rhinoplasty](#) cases.

This year's program will also cover new advances in nasal tip rotation and projection, preservation rhinoplasty updates, avoiding common complications, new principles in revision rhinoplasty, and dead space closure, in addition to many other topics. A special keynote lecture will also be held to honor the late founder of the Dallas Rhinoplasty Symposium, Dr. Jack P. Gunter.

Developed for rhinoplasty surgeons desiring to improve their results with the latest innovations and techniques in rhinoplasty the Dallas Rhinoplasty Meeting offers the opportunity to apply learned techniques in the hands-on cadaver lab with rhinoplasty experts. Known to be one of the largest cadaver dissection workshops, this unique format and anatomy lab have been a hallmark and key component of this annual meeting.

Dallas Rhinoplasty Meeting has become an important international event for surgeons worldwide as a prominent educational venue for sharing the latest techniques and advancements in rhinoplasty. The meeting has brought about crucial shifts in the rhinoplasty field such as the widespread adoption of the "open approach" which is now considered the primary method for performing rhinoplasty surgery today and has also inspired the textbook, "Dallas Rhinoplasty: Nasal Surgery by the Masters" now in its 3rd edition, edited by Drs. Rohrich, Adams, and Ahmad. This text is used as the rhinoplasty textbook in plastic surgery educational programs all over the world.

"The Dallas Rhinoplasty Meeting is one of the most prolific and impactful educational experiences for surgeons studying rhinoplasty," says Dr. Rohrich. "Every plastic surgeon and otolaryngologist with any interest in this difficult procedure should consider attending this unique symposium."

Dr. Rohrich believes that specialized, hands-on educational symposia are a key component in continuing medical education for all surgeons. The Dallas Rhinoplasty Meeting not only provides access to information and advances that are on the forefront of this specialized area of plastic surgery, it is presented in the unique style of teaching that was pioneered by Dr. Rohrich himself.

"Rhinoplasty remains one the most difficult surgical procedures in all of plastic surgery," says Dr. Rohrich. "It takes years to master the great finesse required to provide the best, optimal, long term results safely and consistently."

Dallas Rhinoplasty Meeting is designed for and limited to plastic surgeons, facial plastic surgeons, otolaryngologists, oculoplastic surgeons, dermatologists, and residents in the above specialties. Registration is limited.

Those interested in attending can register at:
