Electric kick scooter is a motorized version of the kick scooter, powered by rechargeable batteries. It is classified as a form of micro-mobility, where the rider stands in the center. It is a flexible, versatile, eco-friendly, and trendy mode of transport. Further, it is simple to operate, convenient for all age groups, and serves as an environment-friendly means of transportation, in comparison to motored vehicles. Thus, use of e-scooters is gaining popularity in populated cities all around the world.

Worldwide services such as Bird, Lime, or Jump that allow users to rent e-kick scooters for a short distance, as an e-hail service via a booking app are becoming very popular. Thus, electric kick scooters have emerged as a cost-effective urban commute option in recent times. In

addition, these scooters help to tackle traffic congestion, owing to their smaller size, attain higher speeds with lesser effort, and gain from the advantages of health benefits. These factors lead to rise in the popularity of electric kick scooters across the globe.

Factors such as the deployment of kick scooters for shared mobility services, surge in the popularity of electric vehicles, and rise in awareness regarding the environmental advantages of electric kick scooters and positive government regulations to encourage the use of electric kick scooters are expected to drive the market growth. However, high maintenance as well as manufacturing cost and ban on use of e-kick scooter in major cities across the world hinder the market growth. Furthermore, growing R&D investments for enhanced battery technologies and rapid technological advancements in the e-kick scooters industry are expected to offer lucrative opportunities for the market growth.

The key players operating in the electric kick scooter market are GOVECS AG, iconBIT, Jiangsu Xinri E-Vehicle Co., Ltd., Ninebot (Segway Inc.), Ningbo MYWAY Intelligent Technology Co., Ltd. (Inokim), Niu International, Razor USA LLC, SWAGTRON, Xiaomi and YADEA Technology Group Co., Ltd.

#### COVID-19 Impact Analysis:

The outbreak of COVID-19 caused huge impacts on global economy, owing to total lockdown and temporary shutdown of industries across the world. Public transport tends to contain many people in one shared space, which boosts the spread of the coronavirus disease. As people reassess ground transportation options in the face of the COVID-19 pandemic, many are choosing isolated modes such as driving or biking over public transportation or ride-sharing. People are choosing electric kick scooter services to cover medium to short distances in view of health safety concerns during the outbreak.

#### Key Findings Of The Study

On the basis of battery type, the others segment is anticipated to exhibit a remarkable growth during the forecast period.

On the basis of voltage, the 25V to 50V segment is the highest contributor to the electric kick scooter market in terms of revenue.
