What are [the key drivers steering the growth of the breast reconstruction market?](#)

The ascending emphasis on aesthetic appearance dictates the upward trajectory in the breast reconstruction market. This emphasis leads to enhanced physical and psychological well-being and patient satisfaction with the reconstruction results. For instance, according to the International Society of Aesthetic Plastic Surgery, a US-based professional body for board-certified aesthetic plastic surgeons, aesthetic procedures increased by 3.4% to reach 35 million in 2023, with the U.S leading with 6.1 million procedures globally.
