There is a considerable increase in awareness of mosquito borne disease, which boosts the demand for spray mosquito repellents. In addition, rise in global temperature provides favorable conditions for the breeding of mosquito, thus, leads to increase in penetration of mosquito repellents in the global market. Moreover, the development of natural herb-based mosquito repellents has reduced various side effects of the repellents on human health such as skin rashes, breathing problems, and other health hazards. Consumers in the developed regions have started using neem-based sprays, creams, & oils, citronella oil, birch tree bark, and other plant-based ingredients. The change in the consumer preferences toward herb-based mosquito repellents is expected to boost the Spray Mosquito Repellent Market Growth.

According to the Spray Mosquito Repellent Market Analysis, the market is segmented into raw material, distribution channel, and region. On the basis of raw material, the bio-based repellent segment held the major share in the market in 2021 and is likely to remain same throughout the Spray Mosquito Repellent Market Forecast period. Bio-based mosquito repellents are considered economically safe and do not affect environment in a negative way.

On the basis of distribution channel, the independent store segment held the major Spray Mosquito Repellent Market Share. Independent stores invest a significant amount of capital into modernizing the facilities and the customization. With increase in demand for mosquito repellents throughout the globe, independent stores help to boost the growth of the mosquito repellent market by reaching unexplored rural areas.

On the basis of region, Asia-Pacific held the major share in the market, owing to rise in awareness regarding the benefits of repellents among consumers and increase in number of borne diseases in countries such as India, the Philippines, and Indonesia. In addition, government initiatives in countries such as India regarding awareness of borne diseases further drive the market growth.

The players operating in the spray mosquito repellent industry have adopted product launch and business expansion as their key developmental strategies to expand their market share, increase profitability, and Spray Mosquito Repellent Market Opportunity in the market. The key players profiled in this report include 3M, BASF SE, Dabur International Ltd, Godrej Consumer Products Limited, Henkel AG & Co. KGaA, Johnson & Johnson, Reckitt Benckiser Group plc, S.C. Johnson & Son Inc, Sawyer Products, Inc, and Spectrum Brands Holdings.
