[What Will Drive the Future Growth of the NoSQL Database Market?](#)

The NoSQL database market size is expected to see exponential growth in the next few years. It is expected to soar to \$37.61 billion in 2028, maintaining a CAGR of 34.2%. A surge in demand for

online gaming and multimedia consumption is expected to propel this growth. The consumption of interactive entertainment and media content such as videos, music, and games accessed online has seen a significant boost, and it is this growth in digital entertainment, technological advancements, and widespread high-speed internet that drives this demand. NoSQL databases are essential for managing the large volumes of unstructured data, supporting high-performance queries, and handling real-time interactions. These attributes enhance user experiences and data processing for complex applications. A recent study by the Office of Communications Ofcom revealed that individuals aged between 13 and 64 years spent an average of seven and a half hours per week playing online games. Therefore, this growing love for online gaming and multimedia consumption is driving the NoSQL database market.
