OBGYN EMR Software Global Market Report 2024 - Market Size, Trends, And Global Forecast 2024-2033

The global OBGYN EMR software market is projected to flourish rapidly, reaching $4.47 billion in 2024 from the $3.86 billion registered in 2023, marking a compound annual growth rate CAGR of 15.6%. This impressive growth rate reflects the effect of government incentives and funding for EHR adoption, burgeoning use of mobile health applications, and increasing emphasis on preventive care. Simultaneously, the escalating number of healthcare facilities implementing EMR and expanding value-based care models further augment the market growth.

> The OBGYN EMR software market size is expected to see rapid growth in the next few years. It will grow to $8.01 billion in 2028 at a compound annual growth rate (CAGR) of 15.7%"

[What Does the Future Hold for the OBGYN EMR Software Market?](#)

The OBGYN EMR software market holds substantial growth potential for the upcoming years. It is expected to grow to a staggering $8.01 billion by 2028 at a compound annual growth rate CAGR of 15.7%. This predicted growth can be attributed to the increasing adoption of electronic health records, surging demand for enhanced patient care and clinical efficiency, rise in high-risk pregnancies, and expanding emphasis on evidence-based medicine. The growing trend of healthcare digitization further propels the market growth in the forecast period. Major trends that are expected to shape the market during the forecast include

integration with maternal-fetal medicine MFM specialties, advancements in healthcare technology, demand for streamlined clinical workflows, advancements in cloud-based solutions, and technological innovations in artificial intelligence AI.

What Drives the Growth of the OBGYN EMR Software Market?

The driver that is most expected to fuel the growth of the OBGYN EMR software market is the increasing adoption of electronic health records. Electronic health records refer to the digital versions of patients' paper charts, providing real-time, patient-centered records that make information available instantly and securely to authorized users. The demand for improved patient care through streamlined data management and a push for healthcare digitization are key factors driving the rise of electronic health records EHRs. OBGYN EMR software enhances these electronic health records by offering specialized tools for managing obstetric and gynecological patient care and improving documentation and workflow efficiency. For instance, in November 2023, the Centers for Disease Control and Prevention CDC revealed that the percentage of office-based physicians adopting the electronic medical record EMR system was 88.2% in 2023 and that 77.8% of office-based physicians have integrated a certified EMR or EHR system into their practices.
