Orthopedic Bone Cement Global Market Report 2024 - Market Size, Trends, And Global Forecast 2024-2033

## [What Is The Projected Growth and Market Size of the Orthopedic Bone Cement?](#)

“

The orthopedic bone cement market size is expected to see strong growth in the next few years. It will grow to \$.25 billion in 2028 at a compound annual growth rate (CAGR) of 6.1%”

*The Business Research  
Company*

The orthopedic bone cement market size has seen a solid growth in recent years and is projected to further grow from \$0.93 billion in 2023 to \$0.98 billion in 2024, clocking a compound annual growth rate CAGR of 5.8%. The recent surge in market size can be attributed largely to factors such as an aging population, rising cases of osteoporosis and joint disorders, increased healthcare expenditure, growing awareness, and enhanced healthcare accessibility.

The orthopedic bone cement market size is also anticipated to witness a strong growth in the coming years, escalating to \$0.25 billion in 2028 at a compound annual growth rate CAGR of 6.1%. Major trends in the forecast period include technological advancements, innovations in

bone cement technology, the adoption of antibiotic-loaded cements, and the development of smart bone cements. This growth in the forecast period can be ascribed to the rising demand for minimally invasive procedures, the increasing prevalence of orthopedic disorders, expansion of orthopedic surgery centers, investment in healthcare infrastructure, and a surge in high-impact sports and activities.

### [What is Driving The Growth of The Orthopedic Bone Cement Market?](#)

An increase in the incidence of accidents and injuries is expected to fuel the growth of the orthopedic bone cement market. Factors such as higher traffic volumes, frequent involvement in high-risk activities, distracted driving, and inadequate safety measures contribute to the rising incidence of accidents and injuries. Orthopedic bone cement is crucial in securing implants and facilitating the repair of fractures and damaged joints, which ensures stability and stimulates healing. Notably, in April 2024, a report published by the National Highway Traffic Safety Administration NHTSA, revealed that approximately 2.38 million individuals were injured in motor vehicle traffic crashes in 2022, a rise from 2.28 million in 2021.
