

Railway Traction Motor Market to Grow at 4.4% CAGR, Reaching USD 48.72 Billion by 2030

WILMINGTON, NEW CASTLE, DE, UNITED STATES, December 11, 2024 /EINPresswire.com/ -- Allied Market Research recently published a report, titled, "[Railway Traction Motor Market](#) by Type (DC Traction Motor, AC Traction Motor and Synchronous AC Traction Motor) and Application (Diesel Locomotive, Electric Multiple Units, Electric Locomotives and Diesel-Electric Locomotives): Global Opportunity Analysis and Industry Forecast, 2021–2030". As per the report, The global railway traction motor market was valued at \$31.44 billion in 2020, and is projected to reach \$48.72 billion by 2030, registering a CAGR of 4.4% from 2021 to 2030.

Key factors driving the market growth include:

Rise in integration of traction motors in railway engines, reduction in performance, low manufacturing and maintenance cost, and low emission levels have boosted the global [railway traction motor market size](#). However, high investment cost and surge in prices of materials used for production hinder the market growth. On the contrary, rise in R&D and surge in the allocation of budget for the development of railways are expected to open new opportunities for the market players in the future.

Key factors hindering the market growth include:

By type, the DC traction motor segment held the largest share in 2020, accounting for around half of the global railway traction motor market, due to high torque and better speed control compared to AC traction motors. However, the AC traction motor segment is projected to register the highest CAGR of 5.0% during the forecast period, owing to advent of power semiconductors that fit AC traction motors on a locomotive.

By application, the electric locomotives segment is estimated to portray the highest CAGR of 6.1% during the forecast period, due to their higher power to weight ratio, greater tractive efforts on steep gradients, and faster acceleration compared to diesel engines. However, the electric

multiple units segment held the largest share in 2020, contributing to nearly two-fifths of the global railway traction motor market, owing to rise in adoption of communication-based automated train transit systems.

By region, the market across Europe, followed by Asia-Pacific and North America, dominated in 2020, accounting for nearly one-third of the market, due to rapid urbanization in developing countries of Europe, surge in investment in development, and increase in fast & reliable railway network. However, the global railway traction motor market across LAMEA is projected to manifest the highest CAGR of 6.3% during the forecast period, due to rise in development of the railway network and transportation industry in the region.

Key players in the global railway traction motor market include:

ABB Group

ALSTOM

Saini Group

BHEL

Bombardier

Mitsubishi Electric Corporation

Hyundai Rotem Company

Sulzer Ltd.

Siemens AG

VEM Group

The Covid-19 pandemic negatively affected the industry due to the financial crisis and economic

recession.

The Covid-19 pandemic negatively affected the industry due to the financial crisis and economic

slowdown.

The prolonged lockdown across European and Asian countries disrupted the supply chain and created challenges such as a shortage of raw materials. Thus, market players had to consider different strategies for alternative sourcing.

Allied Market Research (AMR) is a full-service market research and business-consulting wing of Allied Analytics LLP based in Wilmington, Delaware. Allied Market Research provides global enterprises as well as medium and small businesses with unmatched quality of "Market Research Reports" and "Business Intelligence Solutions." AMR has a targeted view to provide business insights and consulting to assist its clients to make strategic business decisions and achieve sustainable growth in their respective market domain.

We are in professional corporate relations with various companies, and this helps us in digging out market data that helps us generate accurate research data tables and confirms utmost accuracy in our market forecasting. Each and every data presented in the reports published by us is extracted through primary interviews with top officials from leading companies of domain concerned. Our secondary data procurement methodology includes deep online and offline research and discussion with knowledgeable professionals and analysts in the industry.
