

Ultra-Secure Smartphone Market Set for Steady Growth, Estimated to Reach USD 4,934 million by 2031

Rise in customers' inclination toward phone security, growth in adoption of ultra-secure smartphones for military and commercial application

WILMINGTON, NEW CASTLE, DE, UNITED STATES, December 12, 2024

[/EINPresswire.com/](https://www.einpresswire.com/) -- Rise in customers inclination toward ultra-secure smartphones, its ability to provide better security and reliable transmission of data, and growth in adoption of ultra-secure smartphones for military and commercial applications drive the global [ultra-secure smartphone market](#) growth.

However, requirement of cooperating handsets and its high price hampers this growth to a certain extent.

[Global Ultra Secure Smartphone Market](#) (2018-2025) (2018-2025) :

The market is divided according to operating system, end user, and geography. Based on operating system, the market is segmented into Android and iOS. The Android segment held the largest market share in 2017, contributing about 87% of the total market share. Moreover, the segment is expected to register the fastest CAGR of 23.1% during the forecast period. Another segment of iOS is projected to manifest CAGR of 15.2% through 2025.

Android segment dominated the global ultra-secure smartphone market in 2016, and is expected to remain dominant during the forecast period, owing to the rapid adoption of android in many ultra-secure smartphones. Furthermore, it is expected to grow at the highest CAGR of 23.10% during the forecast period.
