CALIFORNIA, CA, UNITED STATES,  
December 12, 2024 /  
EINPresswire.com/ --

Water jet cutting is a non-thermal cutting process that uses a high-pressure stream of water, often mixed with an abrasive material, to cut through various materials. This process is highly precise and is widely used in industries such as automotive, aerospace, and metal fabrication. The market for water jet cutting machines is expected to grow significantly over the next few years, driven by the increasing demand for high-precision cutting solutions.

The market is projected to reach a value of 18 billion USD by 2033, with a compound annual growth rate (CAGR) of 6.1%. Key players in the market include Colfax Corporation, Conzzeta (Bystronic Laser AG), Dardi International Corporation, Flow International Corporation (Shape Tech Group), KMT Waterjet, OMAX Corporation, Resato International BV, Jet Edge, and Belotti SPA. The market is characterized by a high level of competition and a focus on innovation in cutting technology.
