# ANY.RUN Lets Organizations Integrate CTI Feeds to Improve Cybersecurity via MISP

DUBAI, DUBAI, UNITED ARAB EMIRATES, December 12, 2024 /EINPresswire.com/ -- ANY.RUN, a provider of malware analysis and threat intelligence products, has announced the launch of its MISP instance. Now organizations and businesses can access ANY.RUN's CTI Feeds directly in their security solutions and improve their defenses.

## 𝟎𝟎𝟎𝟎𝟎 𝟎𝟎𝟎𝟎

MISP (Malware Information Sharing Platform) is an open-source platform designed to facilitate the exchange, storage, and correlation of threat intelligence data.

With ANY.RUN's MISP instance, organizations gain access to a range of features designed to enhance their threat intelligence and security workflows. They can:

⯈ Obtain real-time IOCs, including malicious IPs, URLs, domains, ports, file names, and hashes
⯈ Seamlessly connect SIEM, XDR, and other security tools to ANY.RUN's MISP instance for streamlined workflows.
⯈ Export indicators in NIDS-compatible formats to improve network security with IDS/IPS or NGFW tools.
⯈ Synchronize their MISP instance with ANY.RUN's to stay updated with the latest threat intelligence data.

Read about this feature and see how you can integrate it in your organization on ANY.RUN's blog.
