

Global Building Information Modeling Market

Market Size, Share, Trends, Growth, Analysis, Insights and Forecast, 2023 - 2033

The global building information modeling (BIM) market size was valued at \$51 billion in 2023 and is projected to reach \$151 billion by 2033, growing at a CAGR of 13.2% from 2024 to 2033.

TOKYO, JAPAN, December 13, 2024

/EINPresswire.com/ --

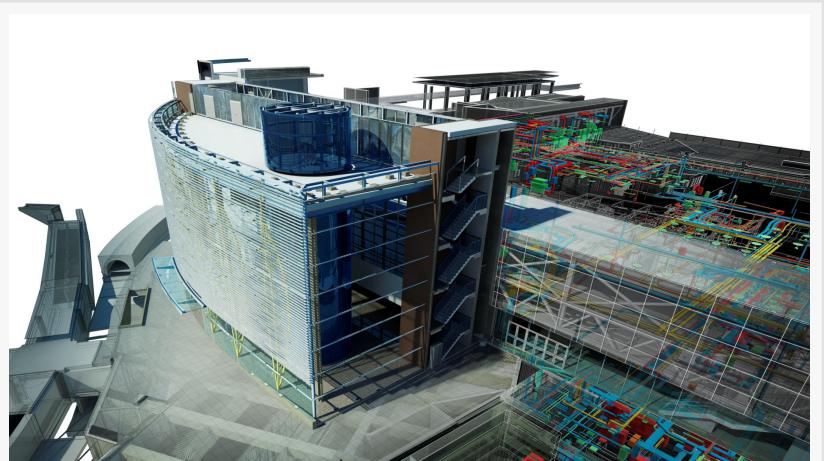

The building information modeling (BIM) market has experienced significant growth over the past decade, driven by the increasing adoption of digital technologies in the construction industry. BIM is a process that integrates all aspects of a building's design, construction, and operation into a single digital model. This allows for better collaboration between different stakeholders, improved efficiency, and reduced costs.

According to the report, the global BIM market is expected to continue its growth trajectory, driven by factors such as the increasing complexity of buildings, the need for sustainable development, and the adoption of advanced technologies like artificial intelligence and machine learning.

The report also highlights the increasing use of cloud-based BIM platforms, which offer greater flexibility and accessibility for users.

Overall, the report suggests that the global BIM market is well-positioned for continued growth and innovation in the years ahead.
