Social Networking Global Market Report 2024 -
Market Size, Trends, And Global Forecast 2024-2033

[What does the future hold for the Global Social Networking Market?](#)

The social networking market size is expected to see exponential growth in the next few years. It will grow to \$206.51 billion in 2028 at a compound annual growth rate (CAGR) of 24.5%”

*The Business Research
Company*

Notably, the social networking market size has seen exponential growth in recent years, escalating from a substantial \$69.23 billion in 2023 to an expected \$86.01 billion in 2024. This growth projection implies a compound annual growth rate CAGR of a significant 24.2%. Factors such as the proliferation of user-generated content, the evolution of social media algorithms, the integration of multimedia features, mobile application growth, and the expansion of broadband internet have significantly fueled this historic period's growth.

What are the Key Drivers Enhancing the Social Networking Market Growth?

Increasing internet penetration is expected to be a major propellant of the social networking

market's growth. Internet penetration refers to the degree of internet usage and accessibility among a population within a specific geographic area. It is often influenced by improved infrastructure, declining internet access, and device costs, and burgeoning digital literacy worldwide.

Notably, social networking bolsters internet usage by encouraging online engagement and offering platforms that inspire people to connect and interact. As such, it significantly increases internet usage across various regions and demographics. According to the International Telecommunication Union, a Switzerland-based specialized agency, the number of individuals using the Internet jumped from 5.1 billion in 2022 to 5.4 billion in 2023. This surge in internet penetration is anticipated to significantly fuel the social networking market's growth.
