Venture Capital Global Market Report 2024 - Market Size, Trends, And Global Forecast 2024-2033

[What Is the Venture Capital Market Size And Growth Rate?](#)

“

The venture capital market size is expected to see rapid growth in the next few years. It will grow to \$553.49 billion in 2028 at a compound annual growth rate (CAGR) of 10.3%”

*The Business Research
Company*

The venture capital market size has been escalating at a remarkable pace in the past few years. Projected to mount from a robust \$338.37 billion in 2023 to an impressive \$373.37 billion in 2024, the market is set for expansion at a compound annual growth rate CAGR of 10.2%. The surge in growth during this historical period can be ascribed to several factors, including favorable economic conditions, increased demand for innovative products and services, successful business exits, advancing globalization trends, and supportive government policies and incentives.

[What Factors Are Driving The Venture Capital Market?](#)

An upswing in the number of startups is expected to be the key driver propelling the growth of the venture capital market. New startups are brimming with innovation and high growth potential, their main objective being to develop distinctive products or services. With lower entry barriers and a boost of readily available funding, the startup culture is blossoming worldwide.

The rising number of startups is fuelled by growth in entrepreneurial culture and support from robust ecosystems. Venture capital plays a pivotal role in this scenario by providing essential funding and support, facilitating rapid scaling, innovation, and the successful market launch of startup products or services.
