What are the Key Market Drivers for Acute Myeloid Leukemia?

The growth of the AML market cannot be discussed without highlighting its major growth drivers. The market's expansion is expected to be propelled by the increase in the older population base and growing unmet healthcare needs. With AML commonly found in the elderly, the growing geriatric population – defined as people aged 65 and over – with unmet health needs will continue to drive demand. For instance, according to the American Cancer Society USA ACS, in 2022, AML was commonly found in elderly people with an average age of diagnosis being 68. Surprisingly, survival rates for elderly AML patients remained remarkably low. The disease affected approximately 60,650 people in 2022 and resulted in 24,000 deaths.
