Growth of the global contact center software market is mainly driven by surge in use of contact center software among organizations to enhance customer experience through multiple channels including voice, video, mobile, web, and social media. In addition, rise in omnichannel communication approach, rapid advancements in the field of customer relationship management, and surge in need for personalized services fuel the global contact center software market. However, difficulty while integrating with legacy systems and cost issues in case of on-premise call center software hamper the market growth to some extent. On the other hand, emergence of advanced technologies such as artificial intelligence, predictive analysis, cloud computing, and machine learning are expected to provide lucrative opportunities for the market growth during the forecast period. Moreover, surge in use of social media by customers is anticipated to be opportunistic for the market growth during forecast period.

In 2019, the global contact center software market share was dominated by the solution segment and is expected to maintain its dominance in the upcoming years, owing to growing popularity of interactive voice response (IVR) solutions to enable quick resolution of queries over calls. These solutions allow customers to resolve product-related matters by themselves rather than depending on customer care executives. However, the services segment is expected to witness the highest growth, owing to extensive adoption of services among end users, as it ensures effective functioning of contact center software throughout the process. In addition, rise in integration of new systems with existing ones at the workplace and rapidly growing demand for implementation of new contact center software is expected to fuel growth of this segment.

By deployment type, the on-premise segment contribute significant share of global contact

center software market share as large corporations are hesitant to move away from on-premise solutions. On-premise contact center software are solely responsible for maintenance and updates. However, the cloud segment is expected to dominate the market as the availability of affordable internet connections is anticipated to boost demand for cloud-based deployment of contact center solutions in organizations.

By enterprise size, the global contact center software market was dominated by the large enterprise segment in 2019, and is expected to maintain its dominance in the upcoming years, as large enterprises have extensive number of customers in numerous regions and account for technical expertise, high market shares, and effective business strategies. Therefore, companies across this segment are anticipated to capitalize on new technologies to effectively run their business.

𝗘𝗻𝗾𝘂𝗶𝗿𝗲 𝗯𝗲𝗳𝗼𝗿𝗲 𝗣𝘂𝗿𝗰𝗵𝗮𝘀𝗲 𝗛𝗲𝗿𝗲 : https://www.alliedmarketresearch.com/contact-center-market/purchase-options

The current estimation of 2027 is projected to be higher than pre-COVID-19 estimates. The COVID-19 outbreak has low impact on growth of the contact center software market, as contact center software adoption has increased in the wake of unprecedented circumstances. There is surge in need for enterprises to break out of legacy infrastructure to develop a more agile approach to customer engagement. However, the success of customer engagement has always been determined by accuracy and speed of request addressal. In addition, the ongoing trend of work from home (WFH) during the pandemic fuels contact center software adoption to ensure business continuity.

Furthermore, companies with on-premises systems are expected to move contact centers to cloud-based software after the pandemic. For instance, as per the NICE inContact survey, 66% of contact center decision makers across the globe whose companies are not using cloud-based contact center software have planned to accelerate their move toward cloud as a result of the pandemic. This factor is expected to provide lucrative opportunities for the market growth after the pandemic.

𝗞𝗲𝘆 𝗙𝗶𝗻𝗱𝗶𝗻𝗴𝘀 𝗢𝗳 𝗧𝗵𝗲 𝗦𝘁𝘂𝗱𝘆 :

By component, in 2019 the solution segment dominated the contact center software market size. However, the services segment is expected to exhibit significant growth during the forecast period.

Depending on deployment type, the cloud segment generated the highest revenue in 2019.

On the basis of enterprise size, the large enterprise segment accounted for the highest revenue in 2019, however, the small & medium enterprises segment is expected to witness highest growth rate during the forecast period.

On the basis of industry vertical, the BFSI segment accounted for the highest revenue in 2019, however, the retail & e-commerce segment is expected to witness highest growth rate during the forecast period.

Region wise, the contact center software market was dominated by North America region. However, Asia-Pacific is expected to witness significant growth in the upcoming years.
