By deployment model, the cloud segment is expected to grow a fastest CAGR during the crowd analytics market forecast period. The cloud-based deployment model does not involve capital cost and is low on maintenance requirements. Hence, it is mostly preferred by SMEs. Direct IT control, internal data delivery & handling, faster data processing, efficient resource utilization, and cost effectiveness of cloud deployment are some of the advantages offered by this model, which are anticipated to boost the 0 market growth.

Region wise, North America dominated the market in 2020, and is expected to maintain this trend during the forecast period. The market is driven by factors, such as market developments, strong economic growth, ongoing commercialization, and increased in ICT spending by government on various projects including, home land security, tourism, and other people management programs.

The global economy has suffered as a result of COVID-19's resurgence. Crowd analytics market trends from a few industrial verticals have resulted in significant financial losses, owing to the lockdowns imposed by governments throughout the globe to prevent further spread of the contamination. Retail outlets; stores; shopping malls; workplaces & working environments; transportation frameworks such as aircraft, rail, street, ; motels; restaurants; bars & clubs; schools; universities; and colleges are significantly impacted. In addition, public gatherings have been kept to minimum. However, restrictions are gradually being relaxed to aid the recovery of the affected regions and to re-energize the global economy. This is expected to support the

growth of crowd analytics industry in future.
