What Factors Are [Driving The Steady Growth Of The Anti-Hypertensive Drugs Market?](#)

A sedentary lifestyle has emerged as a significant accelerator for the rise of the anti-hypertensive drug market. Consumption of unhealthy, processed food, lack of a balanced diet, and irregular sleeping patterns due to shifting work schedules have escalated hypertension cases.

Hypertension is directly related to approximately 45% of deaths due to heart disease and 51% of deaths due to stroke, thus creating a persistent demand for anti-hypertensive drugs. In June 2021, The World Health Organization reported that cardiovascular diseases CVDs are the

principal cause of death globally, taking an estimated 17.9 million lives each year.
