Rise in environmental awareness and concerns, surge in consumer & industrial interest for use of clean energy resources, and increase in use of RFID sensors have boosted the growth of the global green technology and sustainability market. The market across North America held the largest share in 2020, accounting for more than one-third of the market. However, several green technology solution providers have introduced new strategies and business plans for surviving in the market.

The global green technology and sustainability market is segmented on the basis of technology, application, and region. By technology, the market is bifurcated into Internet of Things (IoT), cloud computing, artificial intelligence & analytics, digital twin, cybersecurity, and blockchain. On the basis of application, it is divided into green building, carbon footprint management, weather monitoring & forecasting, air & water pollution monitoring, forest monitoring, crop monitoring, soil condition/moisture monitoring, water purification, and others. Region wise, the market is analyzed across North America, Europe, Asia-Pacific, and LAMEA.
