

Nonmelanoma Skin Cancer Market Forecasted to Surge in Coming Years, 2024-2034 Analysis by DelveInsight

Nonmelanoma Skin Cancer Market Forecast-2034 report offers an in-depth understanding of the forecasted epidemiology as well as the market trends in the 7MM.

LAS VEGAS, NV, UNITED STATES,
December 17, 2024 /

EINPresswire.com/ --

DelveInsight's "Nonmelanoma Skin Cancer Market Insights, Epidemiology, and Market Forecast-2034" report offers an in-depth understanding of the Nonmelanoma Skin Cancer, historical and forecasted epidemiology as well as the Nonmelanoma Skin Cancer market trends in the United States, EU4 (Germany, Spain, Italy, France) the United Kingdom and Japan.

Nonmelanoma Skin Cancer Market Insights

To Know in detail about the Nonmelanoma Skin Cancer market outlook, drug uptake, treatment scenario and epidemiology trends, Click here; [Nonmelanoma Skin Cancer Market Forecast](#)

Some of the key facts of the Nonmelanoma Skin Cancer Market Report:

- The Nonmelanoma Skin Cancer market size is anticipated to grow with a significant CAGR during the study period (2020-2034)
- In August 2024, SkinCure Oncology, a global leader in offering a comprehensive model for delivering Image-Guided Superficial Radiation Therapy (Image-Guided SRT), the leading nonsurgical treatment for common skin cancers, has announced the publication of a new study highlighting the importance of conducting full dermal visualization (FDV) through high-resolution dermal ultrasound (HRDUS) before each treatment fraction for nonmelanoma skin cancer (NMSC) using Image-Guided SRT.
- Basal cell carcinoma represents approximately 80% of all skin cancer cases and typically occurs in sun-exposed areas like the face and neck. Squamous cell carcinoma accounts for about 20% of the remaining skin cancer cases.
- Skin cancer is the most typical cancer, according to Cedars-Sinai (n.d.). Skin cancer accounts for

between 40 and 50 percent of all cancer cases detected each year

- Goldenberg et al. (2016) conducted a retrospective cohort analysis using Truven Health MarketScan database insurance claims, enrolling patients 18 years of age or older with two or more BCC claims that were at least 30 days apart between October 2011 and September 2012. The age-adjusted prevalence rate for BCC patients was 342.64 per 100,000. The prevalence rates were higher in males than in females, higher in patients 65 years of age or older, and lowest in patients 18 to 24 years of age
- STP705, AIV001, RP1, and other new treatments for non-melanoma skin cancer (NMSC) are available. The market will be driven by the approval of these therapies because it will give patients new and varied treatment options
- Key Nonmelanoma Skin Cancer Companies: Genentech, Sanofi, Sirnaomics, AiViva BioPharma, Replimune, Ortho Dermatologics, Philogen S.p.A., AstraZeneca, Pfizer, and others
- Key Nonmelanoma Skin Cancer Therapies: VISMODEGIB (erivedge), LIBTAYO (cemiplimab-rwlc), STP705, AIV001, RP1, Tretinoin 0.1%, L19IL2 +L19TNF, Iressa, sirolimus, and others
- The Nonmelanoma Skin Cancer epidemiology based on gender analyzed that Men are two times more likely than women to develop basal cell carcinoma and three times more likely to develop squamous cell carcinoma than Women
- The Nonmelanoma Skin Cancer market is expected to surge due to the disease's increasing prevalence and awareness during the forecast period. Furthermore, launching various multiple-stage Nonmelanoma Skin Cancer pipeline products will significantly revolutionize the Nonmelanoma Skin Cancer market dynamics.

Nonmelanoma Skin Cancer Overview

Skin tumours that don't start out as melanoma are referred to as non-melanoma skin cancer. These more typical types of skin cancer are distinguished from the less frequent melanoma, which spreads more quickly in the body, by the name "non-melanoma."

Nonmelanoma Skin Cancer Epidemiology

The epidemiology section provides insights into the historical, current, and forecasted epidemiology trends in the seven major countries (7MM) from 2020 to 2034. It helps to recognize the causes of current and forecasted trends by exploring numerous studies and views of key opinion leaders. The epidemiology section also provides a detailed analysis of the diagnosed patient pool and future trends.

Nonmelanoma Skin Cancer Epidemiology Segmentation:

The Nonmelanoma Skin Cancer market report proffers epidemiological analysis for the study period 2020–2034 in the 7MM segmented into:

- Total prevalent cases of NMSC in the 7MM (Basal cell carcinoma, Squamous cell carcinoma)
- Total diagnosed prevalent cases of NMSC in the 7MM

- Treatable cases of NMSC in the 7MM
- Gender-specific diagnosed prevalent cases of NMSC in the 7MM
- Region-specific diagnosed prevalent cases of NMSC in the 7MM
- Age-specific diagnosed prevalent cases of NMSC in the 7MM

Nonmelanoma Skin Cancer Drugs Uptake and Pipeline Development Activities

The drugs uptake section focuses on the rate of uptake of the potential drugs recently launched in the Nonmelanoma Skin Cancer market or expected to get launched during the study period. The analysis covers Nonmelanoma Skin Cancer market uptake by drugs, patient uptake by therapies, and sales of each drug.

Moreover, the therapeutics assessment section helps understand the drugs with the most rapid uptake and the reasons behind the maximal use of the drugs. Additionally, it compares the drugs based on market share.

The report also covers the Nonmelanoma Skin Cancer Pipeline Development Activities. It provides valuable insights about different therapeutic candidates in various stages and the key companies involved in developing targeted therapeutics. It also analyzes recent developments such as collaborations, acquisitions, mergers, licensing patent details, and other information for emerging therapies.

Nonmelanoma Skin Cancer Therapies and Key Companies

- VISMODEGIB (erivedge): Genentech
- LIBTAYO (cemiplimab-rwlc): Sanofi
- STP705: Sirnaomics
- AIV001: AiViva BioPharma
- RP1: Replimune
- Tretinoin 0.1%: Ortho Dermatologics
- L19IL2 +L19TNF: Philogen S.p.A.
- Iressa: AstraZeneca
- sirolimus: Pfizer

Scope of the Nonmelanoma Skin Cancer Market Report

- Study Period: 2020–2034
- Coverage: 7MM [The United States, EU5 (Germany, France, Italy, Spain, and the United Kingdom), and Japan]
- Key Nonmelanoma Skin Cancer Companies: Genentech, Sanofi, Sirnaomics, AiViva BioPharma, Replimune, Ortho Dermatologics, Philogen S.p.A., AstraZeneca, Pfizer, and others
- Key Nonmelanoma Skin Cancer Therapies: VISMODEGIB (erivedge), LIBTAYO (cemiplimab-rwlc), STP705, AIV001, RP1, Tretinoin 0.1%, L19IL2 +L19TNF, Iressa, sirolimus, and others
- Nonmelanoma Skin Cancer Therapeutic Assessment: Nonmelanoma Skin Cancer current marketed and Nonmelanoma Skin Cancer emerging therapies

- Nonmelanoma Skin Cancer Market Dynamics: Nonmelanoma Skin Cancer market drivers and Nonmelanoma Skin Cancer market barriers
- Competitive Intelligence Analysis: SWOT analysis, PESTLE analysis, Porter's five forces, BCG Matrix, Market entry strategies
- Nonmelanoma Skin Cancer Unmet Needs, KOL's views, Analyst's views, Nonmelanoma Skin Cancer Market Access and Reimbursement
