Biohacking Global Market Report 2024 - Market Size, Trends, And Global Forecast 2024-2033

In the rapidly evolving world, biohacking has emerged as a significant arena of discussion, with its global market projected to witness record-breaking growth. The market size for biohacking,

“

The biohacking market size is expected to see exponential growth in the next few years. It will grow to \$86.53 billion in 2028 at a compound annual growth rate (CAGR) of 24.2%”

*The Business Research  
Company*

which stood at \$29.42 billion in 2023, is predicted to catapult to \$36.41 billion in 2024, registering a compound annual growth rate CAGR of 23.7%. This growth has been largely spurred by increased health consciousness, improved access to information, proliferating entrepreneurial culture, and the quantified self-movement momentum. With the persistent advancements in the biohacking sector, it is imperative to understand not just the current market scenario, but also its future prospects and key market drivers.

[What Awaits the Biohacking Market In Future Years?](#)

The biohacking industry is poised for exponential growth, with predictions indicating its size to soar to \$86.53 billion by 2028 at a CAGR of a substantial 24.2%. The growth factors leading to this tremendous expansion in the forecast period revolve around the increasing focus on longevity and anti-aging, escalating the prominence of nootropics and cognitive enhancements, mainstream adoption, corporate wellness programs, and a transformative regulatory landscape. Correspondingly, major trends influencing the industry include biohacking methods for longevity and anti-aging, incorporation of biohacking wearables and devices, nootropics for cognitive enhancements, and biohacking techniques for sleep optimization, alongside the groundbreaking

genetic editing and CRISPR technology.

### Growth Drivers Fueling Biohacking's Uptrend

The escalating prevalence of chronic diseases is touted to be a significant driving force propelling the growth of the biohacking market going forward. Chronic diseases, categorized as conditions or illnesses that last three months or longer with a potential to worsen over time, are making headway in dedicating themselves to the list of global health concerns. The biohacking methods, including body nutrition enhancement, intermittent fasting, and provisional therapies like hydrogen inhalation, offer potential solutions to combating chronic diseases like cancer. An estimate published by the National Centre for Biotechnology Information NCBI in January 2023 foretells the number of individuals aged 50 years and above inflicted with at least one chronic illness to surge by a staggering 99.5% by 2050. This figure, rising from 71.522 million in 2020 to 142.66 million, underscores the significance of the rising prevalence of chronic diseases, thereby driving the growth of the biohacking market.

### Who Are The Major Players In the Biohacking Market?

Apple Inc., Nootropics Depot LLC, LifeLabs Medical Laboratory Services, Fitbit Inc., NOW Foods LLC, Thorne Research Inc., Primal Life Sciences Inc., OsteoStrong LLC, Jarrow Formulas Inc., Athletic Greens Inc., Wild Health Inc., Perfect Keto LLC, BioXcel Therapeutics Inc., Mind Lab Pro LLC, Elysium Health Inc., Thync Global Inc., HVMN Inc., Thriveport LLC, Kaatsu Global Inc., Beeblesoft Ltd., Interaxon Inc., SynBioBeta LLC, Behavioral Tech Corporation, Synbiota Inc., uBiome Corporation, InsideTracker Inc., Neuralink Corporation, LifeNome Inc., Pure Encapsulations LLC, Bioquark Inc. are the key companies to watch for in this burgeoning biohacking market.

### How Are [The Evolving Market Segments Shaping The Biohacking Landscape?](#)

The biohacking market exhibits a wide range of segmentation:

- 1 By Product: Wearables, Implants Chips, Gene Modification Kits, Smart Drugs, Supplements, Mobile Apps, Other Products
- 2 By Component: Solution, Services
- 3 By Application: Synthetic Biology, Genetic Engineering, Forensic Science, Diagnosis and Treatment, Drug Testing
- 4 By End-User: Pharmaceutical and Biotechnology Companies, Hospitals and Clinics, Forensic Laboratories, Research and Academic Institutes, Other End Users

### A Geographic Perspective On The Biohacking Market Scene

In 2023, North America assumed the position of the largest region in the biohacking market.

Primed for substantial growth in the forecast period, it stands as the fastest-growing region, embracing the expansive fields of biohacking. The market report stretches over an extensive geographic canvas, encompassing Asia-Pacific, Western Europe, Eastern Europe, North America, South America, Middle East, and Africa.
