

Spirion Unveils Sensitive Data Platform v.13.3, Featuring Reporting REST API for Advanced Data Insights & Enhanced DSPM

New Reporting API unlocks seamless integrations, advanced insights, and tailored reporting.

TAMPA, FL, UNITED STATES, December 17, 2024 /EINPresswire.com/ -- [Spirion](#) has launched version 13.3 of its [Sensitive Data Platform](#) (SDP), introducing a powerful Reporting API to access data for external automation and integrations, significantly enhancing its [Data Security Posture Management](#) (DSPM) capabilities.

Tailor-Made Reporting and API Integration

The new Reporting API expands SDP's data accessibility beyond the application interface and Spirion

Enhanced Analytics (SEA), providing a third channel for data insights. This extensible data extraction capability empowers organizations to integrate critical scan activity insights into centralized or downstream solutions, informing better policy and practice development.

Additional Key Enhancements

Version 13.3 introduces several other features designed to improve data security, scalability, and efficiency:

- **Enhanced Data Asset Inventory:** Organize scan targets dynamically and track Sensitive Data Value, Volume, and Vulnerability (SDV3) metrics with precision.
- **Bulk Target Imports:** Add multiple target locations efficiently to protect critical assets.
- **Audit Log Enhancements:** Gain deeper insights into SDP console activity with granular access controls.
- **Cloud Target Optimizations:** Experience faster scan results through streamlined interactions for cloud storage.
- **Search Logic Improvements:** Fine-tune built-in search definitions for improved contextual
