What's propelling the cannabis products market's exponential growth?

The market size of cannabis products is projected to rocket upward in the coming years, reaching \$159.93 billion in 2028 at a robust CAGR of 25.9%. This growth can be credited to dynamics along the supply chain, international market expansion, patterns in investment and funding,

regulatory changes, market competition and consolidation. The forecast period is expected to be marked by significant trends like legislation and legalization, a focus on health and wellness, product innovation and diversity, as well as a greater emphasis on consumer education and awareness, alongside celebrity and brand endorsements.

What is driving the intensifying growth in the cannabis products market?

A major conceivably growth factor for the cannabis products market is the broadening array of medical applications for cannabis. Derived primarily from Indian hemp plants like Cannabis sativa and Cannabis indica, cannabis is noted for its primary active chemical, THC delta-9 tetrahydrocannabinol. Despite being a psychoactive drug, its medical applications for treating conditions like nausea, glaucoma, epilepsy, and asthma have led many countries to legalize its use. Some other applications include managing chronic pain, depression, arthritis, diabetes, migraines, epilepsy, AIDS, Alzheimer's disease, and Parkinson's disease. As per records from Harvard Health, about 85% of Americans support legalizing medical marijuana, and it is currently in use by several million Americans.
