

# Aiarty Image Enhancer V3.0 Launches with New Generative Super Resolution Models and AI Face Restoration

*Aiarty Image Enhancer V3.0 released with two new AI upscaling models, face restoration feature, DPI output settings, and several improvements.*

CHENGDU, SICHUAN, CHINA,  
December 20, 2024 /

[EINPresswire.com/](https://www.aiarty.com/) -- Aiarty announces the release of [Aiarty Image Enhancer V3.0](#), the latest iteration of its cutting-edge image enhancement software. This update introduces two new AI image upscaling models, advanced face restoration, DPI output settings, and several improvements, marking a significant milestone in AI-driven image processing.

Aiarty Image Enhancer V3.0

Aiarty Image Enhancer is a generative AI-powered image enhancement software that can automatically deblur, denoise, sharpen and upscale images while generating realistic details.

“

With the release of Aiarty Image Enhancer V3.0, we're proud to offer a versatile and powerful tool that meets the needs, from personal projects to professional photography and e-commerce businesses.”

*Jack Han, CEO of Digiarty*

With the official release now available, the Aiarty team invites users to explore these cutting-edge AI features:

<https://www.aiarty.com/ai-image-enhancer/>

At the core of V3.0 are More-Detail GAN v3 and AIGCsmooth v3, two new AI models designed to deliver superior image clarity. More-Detail GAN v3 enhances texture stability and detail accuracy for upscaling images to 4K or 10K resolutions, while AIGCsmooth v3 is tailored for AI-generated content, ensuring refined and polished outputs.

The new [AI Face Restoration](#) feature employs advanced

algorithms to recover natural facial details, remove imperfections such as blemishes, acne, red

eyes, freckles, blurriness, and grain, enhancing group photos, selfies, old portraits, low-light pictures, and AI-generated images. Combining Gradient Overlay for seamless transitions and Routine Overlay for efficient processing, it produces lifelike and high-quality results.

DPI Output Settings provide users with flexible resolution control, enabling high-quality exports for both digital and print projects. Additional enhancements include improved color accuracy, minimized checkerboard artifacts, and streamlined export settings with customizable file naming.

“With the release of Aiarty Image Enhancer V3.0, we’re proud to offer a versatile and powerful tool that meets the needs of a wide range of users,” said Jack Han, CEO of Digiarty Software. “From personal projects to professional photography and e-commerce businesses, this software empowers anyone seeking to enhance their multimedia content with exceptional efficiency and precision. Our goal is to simplify the image enhancement process while delivering unparalleled quality, making advanced AI technology accessible to everyone.”
