EINPresswire.com/ -- At the age of 83, Author, Via Thomas, grandmother, was diagnosed with colon cancer, despite being told nearly a decade earlier about a tumor on her rectum. Instead of relying solely on traditional medical treatments, she turned to natural remedies to manage her symptoms. Her inspiring journey has now been documented in a new book, *Healing Beyond Medicine: A Holistic Approach to Cancer Recovery*.

In 2015, Via Thomas received a life-altering diagnosis: breast cancer.

During her journey, she found herself reflecting on the wisdom of her grandmother, who had turned to natural, holistic remedies like golden seal and raw almonds to support her battle against breast cancer. These remedies, rooted in nurturing the whole person—mind, body, and spirit—became a profound source of inspiration for Via.

Her reflections culminated in the book *Healing Beyond Medicine: A Holistic Approach to Cancer Recovery*. In this deeply personal and empowering work, Via shares her journey and offers insights into how holistic practices can complement traditional treatments. She emphasizes the importance of nurturing not just the physical body but also the mind and spirit in the healing process.

The book is more than just a memoir—it's a guide for those navigating the challenges of cancer. Packed with practical tips and a comprehensive overview of natural approaches, it explores how mindfulness, balanced nutrition, and emotional well-being can play pivotal roles in recovery. Whether you're directly affected by cancer or supporting a loved one, *Healing Beyond Medicine* offers a beacon of hope and a roadmap for healing on every level.
