

Stesso Enhances Data Accuracy and Reduces Downtime with Skyvia's Integration Solution

Stesso uncovered how Skyvia has streamlined its data synchronization, ensuring consistency across systems and minimizing manual processes.

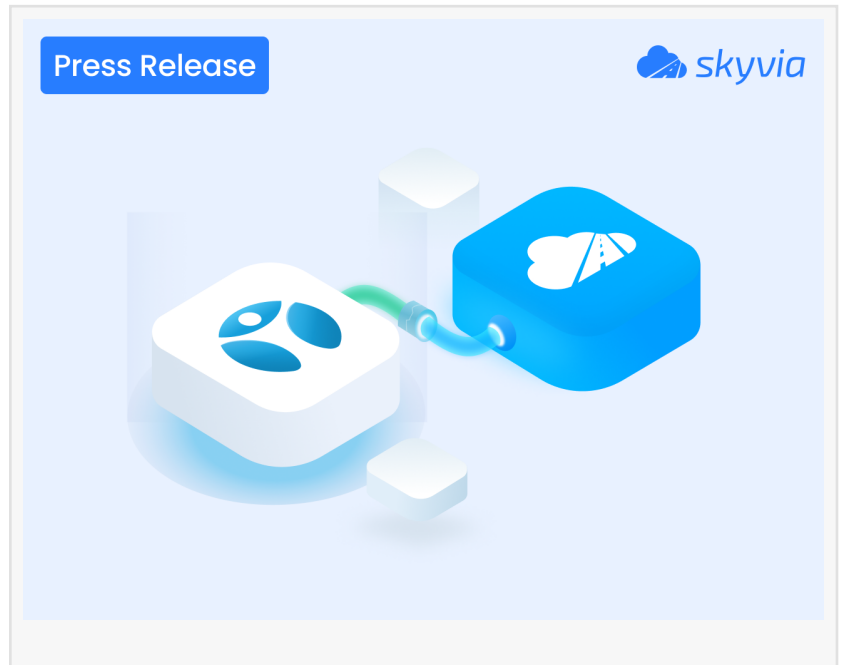

PRAGUE, CZECH REPUBLIC, December 26, 2024 /EINPresswire.com/ -- [Skyvia](#), the most comprehensive data integration platform, revealed how Stesso, a property management company, has improved data accuracy and streamlined operations by implementing Skyvia's data integration solution. Previously, Stesso faced ongoing data inconsistencies and delays caused by manual entry and

syncing across their property management and accounting systems. These challenges impacted the efficiency of daily operations, especially as the company expanded.

Stesso used MySQL database within their internal SIGEM system as its primary data hub alongside Zoho CRM for client and prospect management. According to Stesso, maintaining consistent data flow between these systems became increasingly complex, leading to duplicated entries and delays. The growing volume of data highlighted the need for an efficient, automated solution to keep records accurate and reduce the workload on their development team. These issues escalated as Stesso grew its portfolio.

By adopting Skyvia, Stesso automated data transfers between Zoho CRM and MySQL, eliminating the need for manual input and reducing the risk of discrepancies. Implementation of Skyvia has allowed Stesso to achieve seamless data flow, ensuring consistency across systems and minimizing operational delays.

"Previously, we captured information such as Companies and Contacts twice from Zoho CRM to our SIGEM system. Skyvia helped us solve this by integrating and replicating the prospect data into SIGEM," Carlos Zavala, a representative from Stesso, shared.

Since integrating Skyvia, Stesso has optimized its data management processes, reducing downtime and resource allocation to manual data synchronization.

“Stesso’s use of Skyvia showcases the versatility of our platform across industries, including real estate,” said Oleksandr Khirnyi, Chief Product Officer at Skyvia. “Our goal is to help companies like Stesso streamline data workflows and enhance operational efficiency with seamless integration solutions.”
