Increase in use in the plastics processing industry, surge in end-uses of rubber products, and use of lithopone in the paints & coatings industry fuel the growth of the global lithopone market. On the other hand, availability of alternative inorganic white pigments impedes the growth to some extent. However, new product development would create new opportunities in the industry.

The global lithopone industry is analyzed across application and region. On the basis of application, the paints and coatings segment held the major share in 2019, contributing to around one-third of the global lithopone market. The same segment would also cite the fastest CAGR of 4.2% throughout the forecast period.

On the basis of region, the market across Asia-Pacific would exhibit the "fastest CAGR" of 4.1% by 2027. The same region would also dominate in terms of revenue in 2019, garnering nearly half of the global market. The other provinces discussed in the report include Europe, North America, and LAMEA.
