[EINPresswire.com/](https://www.einpresswire.com/) -- [Planet TV Studios](#)

is pleased to announce that its latest installment of the acclaimed documentary series "New Frontiers" will highlight the Fly Little Bird Foundation, a family-led non-profit organization dedicated to advancing research and treatment for an ultra-rare disease. This episode is set to air on Fox Business during the first quarter of 2025, offering viewers an exclusive window into ultra rare disease advocacy and research.

Family foundations and rare disease advocacy organizations such as Fly Little Bird Foundation play a vital role in advancing research and policy for conditions that are not well known or understood but that have profound and life-altering impacts on those who have them as well as their families and loved ones.

Through strategic research collaborations and patient-centered initiatives, Fly Little Bird Foundation seeks to bring hope and awareness to patient communities and to push forward scientific research and eventually a treatment for those with [TBL1XR1 gene variants](#). TBL1XR1 gene variants have been linked to intellectual and developmental disabilities, autism spectrum disorder, epilepsy, and defects of the brain, heart, and kidney. By bringing their efforts to a broad television audience, "New Frontiers" aims to inform viewers about the importance of raising awareness and understanding of ultra-rare disease, community and connectivity within rare disease communities, research-driven care, and collaborative problem-solving.

"New Frontiers" is recognized for examining visionary endeavors that shape the future of science, healthcare, and humanitarian outreach. This new episode delves into the pioneering techniques and methods employed by the dedicated network of scientists, researchers, and clinicians that have partnered with Fly Little Bird Foundation. It also shows the immense benefits of bringing together families, caregivers, and children from around the world who have the same genetic condition.

"We are honored to bring viewers the important work of the Fly Little Bird Foundation," said Christian Alain, Executive Producer at Planet TV Studios. "Their unwavering commitment to improving lives of those with an ultra- rare disease through scientific research, raising awareness, and advocacy exemplifies the spirit of progress that defines 'New Frontiers.' We look forward to sharing their story and illuminating the profound impact they have within the rare disease patient and research community on Fox Business in early 2025."

By featuring this narrative, "New Frontiers" not only underscores the ongoing journey of discovery but also encourages a more informed conversation about the power of medical science, collaboration, and perseverance in driving meaningful change.
