

Europe Biodiesel Market: Driving Sustainable Energy

Europe Biodiesel Market projected to grow at a CAGR of 3.1% from 2023 to 2032

WILMINGTON, DE, UNITED STATES, January 2, 2025 /EINPresswire.com/ --

According to a new report published by Allied Market Research, The [Europe biodiesel market](#) size was valued at \$25.1 billion in 2022 and is estimated to reach \$34.0 billion by 2032, exhibiting a CAGR of 3.1% from 2023 to 2032.

Biodiesel, a renewable and biodegradable fuel manufactured from vegetable oils and animal fats, stands as a clean-burning alternative to conventional diesel. Produced through

transesterification, a chemical process that converts natural fats and oils into Fatty Acid Methyl Esters (FAME), biodiesel is versatile and can be blended with petroleum diesel in any proportion.

“

Rise in energy security concerns, environment regulations, and development in renewable fuel standards drives the growth of Europe Biodiesel Market.”

Germany is the major consumer of biodiesel among other countries. It accounted for nearly one-fifth of the market

share in 2022.

The major players operating in the [Europe biodiesel industry](#) include Cargill Incorporated, Eni S.p.A., Bunge, Kolmar, Ital Bi Oil S.R.L., Bp Oil International Ltd., Tamoil Italia S.P.A., Italiana Petroli S.P.A., Esso Italiana S.R.L., Masol Continental Biofuel Srl, and Saras S.P.A.

In 2022, Cargill Incorporated opened an advanced biodiesel plant in Ghent, Belgium. This facility converts waste oils and residues into renewable fuel, was built by Austria-based BDI BioEnergy International. The new facility in Ghent has the capacity to produce up to 115,000 metric tons of renewable fuel per year.

In 2022, Esso Italiana S.r.l. launched a limited trial of its new Esso Supreme 25% renewable diesel in the south-east of the UK. The fuel has 15% lower life cycle greenhouse gas emissions (GHG) than regular diesel.

Major sources of biodiesel include crops like palm, soybean, and rapeseed, with high-quality biodiesel often derived from waste vegetable oils sourced from chip shops, restaurants, and industrial food producers.

The benefits of biodiesel range from its compatibility with almost all diesel engines to its status as a carbon-neutral liquid, ensuring that its combustion does not produce a net output of carbon dioxide.

Enquiry Before Buying: <https://www.alliedmarketresearch.com/purchase-enquiry/A323227>

Biodiesel has been used in diverse applications, from powering the British Royal Train in 2007 to serving as a heating fuel in commercial and domestic boilers. These environment-friendly properties of renewable fuels boost the importance of addressing sustainability challenges in the energy sector.

Biodiesel, a domestically produced and renewable substitute for petroleum diesel, offers a multitude of advantages that contribute to both energy security and environmental sustainability.

One key benefit lies in its positive impact on reducing dependence on foreign oil and enhancing domestic energy production. Moreover, biodiesel is environment-friendly, being biodegradable and non-toxic, with a life cycle analysis indicating a substantial reduction of carbon dioxide emissions compared to petroleum diesel.

Beyond its eco-friendly attributes, biodiesel improves engine operation by enhancing fuel lubricity and raising the cetane number, essential for the longevity of diesel engines. Safety is another notable aspect, as biodiesel boasts a higher flash point than conventional diesel, enhancing safety in potential crash scenarios.

Biodiesel is compatible with almost all diesel engines without requiring modifications, providing flexibility for widespread use. Derived from renewable sources such as waste vegetable oils and animal fats, biodiesel represents a sustainable and greener fuel option.

It is crucial to note that the specific benefits may vary based on factors such as the biodiesel

blend and feedstock used. Ultimately, biodiesel stands as a versatile and environmentally conscious solution in the quest for cleaner and more sustainable energy alternatives.

The global demand for biofuels, including biodiesel, is on the rise due to population growth, technological advancements, and an increase in preference for cleaner energy sources.

Government initiatives, such as India's National Bioenergy Program, further support the biofuel sector.

In addition, ongoing technological advances, including the development of cost-effective catalysts and efficient production methods, are crucial in reducing production costs.

The growing awareness of environmental concerns, particularly related to greenhouse gas emissions, is strengthening the Europe biodiesel market. Economic factors, such as the volatility of fossil fuel prices and rising demand for domestic fuel alternatives, contribute to the market's growth.

Infrastructure development, especially the adoption of high-quality biodiesel in construction and mining equipment, further propels the growth of the [biodiesel market in Europe](#).

Biodiesel plays a role in enhancing energy security by harnessing solar energy through feedstock crops. It is essential to note that these opportunities are projections, subject to variations based on technological advancements, policy changes, and market dynamics.

On the basis of feedstock, the recycled cooking oil segment emerged as the global leader by acquiring more than two-fifths of the Europe biodiesel market share in 2022 and is anticipated to continue this trend during the forecast period.

About Us

Allied Market Research (AMR) is a full-service market research and business-consulting wing of Allied Analytics LLP based in Portland, Oregon. Allied Market Research provides global enterprises as well as medium and small businesses with unmatched quality of "Market Research Reports" and "Business Intelligence Solutions." AMR has a targeted view to provide business insights and consulting to assist its clients to make strategic business decisions and achieve sustainable growth in their respective market domain.

Pawan Kumar, the CEO of Allied Market Research, is leading the organization toward providing high-quality data and insights. We are in professional corporate relations with various companies and this helps us in digging out market data that helps us generate accurate research data tables and confirms utmost accuracy in our market forecasting. Each and every data presented in the reports published by us is extracted through primary interviews with top officials from leading companies of domain concerned. Our secondary data procurement methodology includes deep online and offline research and discussion with knowledgeable professionals and analysts in the industry.
