

# Thinkstack Achieves SOC 2 and GDPR Certifications to Secure Customer Data

*These new certifications mean safer data, stronger trust, and better peace of mind for you and your customers.*

NEW YORK, NY, UNITED STATES,  
January 6, 2025 /EINPresswire.com/ --

The digital-first mindset places data at the center of every business decision. But, with data comes immense responsibility. With increasing reliance on AI, protecting sensitive data is more important than ever.

A single data breach can damage your reputation, lose customer trust, and hurt your business. Statista's research underscores this issue's scale, with global cybercrime costs reaching \$9.22 trillion in 2023.

Today, organizations must meet rigorous data security and privacy standards and have compliance certifications backing their claims of data security standards.

These certifications aren't just badges. They're a promise to our partners and their customers that their data is always handled with the highest standards of security and privacy."

*Basudev Saha, Co-founder  
and CTO*

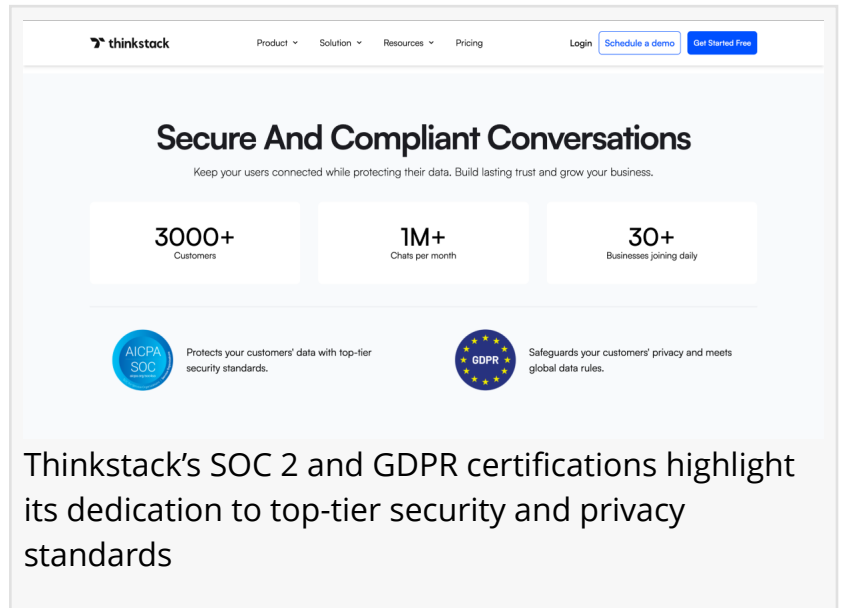

Thinkstack understands this responsibility. This is why it proudly announces its achievement of SOC 2 Type II Certification and full GDPR compliance. This milestone reflects Thinkstack's promise to create a secure, reliable, and privacy-first platform.

By meeting these standards, Thinkstack ensures businesses partnering with it will be able to:  
--Protect customer and business data from unauthorized

access or breaches.

--Confidently handle EU resident data with robust, privacy-first operations.

--Save time and simplify vendor assessments with certifications that meet industry

benchmarks.

--Build trust with their clients by working with a platform that prioritizes safety and transparency.

Thinkstack platform is not just about innovation but about secure innovation and offers:

--Real-time security measures to keep your data safe, always.

--Automated processes that protect privacy while boosting efficiency.

--Resilience against evolving digital threats, giving you confidence in every interaction.

If you're curious about how AI and its applications can excel under strict regulations while boosting data security and privacy, experience the Thinkstack effect. [Visit their website](#) or [request a live demo](#) to see their promise in action.

#### About Thinkstack

Thinkstack is an AI-powered SaaS platform dedicated to transforming business operations through intelligent automation. The brand, as an architect of the future of business, commits to leveraging the latest artificial intelligence trends to solve the most pressing operational efficiency challenges.
