## Prime Drivers of Growth

The global wealth management market is driven by rapid demand for alternative investments including private equity, commodities, hedge funds, real estate investment trusts (REITs), and intellectual property. However, factors such as strict rules of the government for wealth management companies, lack of pricing transparency, and high fees restrict the market growth. On the other hand, technological advancements and untapped potential of emerging economies are providing lucrative opportunities for the market growth.

## The Human Advisory Business Model to Maintain the Leading Position Throughout the Forecast Period

Based on business model, the human advisory segment dominated the market with the highest market share in 2020, garnering more than three-fourths of the global wealth management market, and is expected to lead throughout the forecast period. These advisors serve a changing client base in a variety of demographics and offer fluidity in the approach while managing wealth, which in turn, drives the growth of the segment. However, the robo advisory segment is expected to portray the fastest CAGR of 26.4% from 2021 to 2030, attributed to easy account

setup, comprehensive education, portfolio management, robust goal planning, account services, security features, attentive customer service, and low fees.

## The Traditional Wealth Managers Segment to Maintain the Leading Position during the Forecast Period

Based on provider, the traditional wealth manager segment generated the largest share in 2020, contributing to nearly two-thirds of the global wealth management market, and is projected to maintain its dominance throughout the forecast period. This is because a traditional wealth manager offers convenience and reduces stress towards managing finances of the clients. On the other hand, the fintech advisors segment is anticipated to manifest the highest CAGR of 16.8% from 2021 to 2030. The growth of the segment is due to the efforts of fintech advisors to create a solid business plan and market strategy, advice on regulatory compliance that meets state and federal standards, and help in building credible relationships with banks, customers, and investors.

## North America to Maintain its Dominance by 2030

Based on region, North America held the largest market share in terms of revenue in 2020, accounting for more than half of the global wealth management market, and is anticipated to maintain its lead by 2030. This is attributed to the presence of a massive number of high net-worth individuals and increase in number of competitions among banks such as UBS, Morgan Stanley, and Bank of America Corporation to offer the maximum benefits to their clients. However, the Asia-Pacific region is projected to manifest the fastest CAGR of 12.7% during the forecast period, due to the several high net worth & ultra-high net worth individuals continuing to demand wealth management product lines in the region.

## Leading Market Players

Bank of America Corporation,
