Key factors influencing the Saudi Arabia & GCC medium voltage cable accessories market include government investments in power grids, growth in the construction sector, and an increase in data centers”

*Allied Market Research*

Medium voltage cable accessories range from 3.3.KV to 33kV. Medium voltage cable accessories are primarily used to connect and secure different-sized cables. Besides, it provides complete protection to internal as well as external equipment. It enhances the efficiency and reliability of a network or grid. According to applications of medium voltage cable accessories, i.e., indoor, or outdoor, diverse kinds of accessories are available in the market and their selection primarily depends on operating parameters, site conditions, and cable types.

A substantial investment in the construction sector majorly drives the growth of the Saudi Arabia

and GCC medium voltage cable accessories market, as growth of the construction sector directly increases the demand for medium voltage cable accessories for new construction. Moreover, the surge in the use of underground cables with the rise in urbanization & industrialization, a rise in investments for infrastructure development both by the private & public sectors, and an increase in focus on sustainable ways of generating electricity are expected to boost Saudi Arabia and GCC medium voltage cable accessories market growth. Furthermore, growth in the adoption of e-mobility, a rise in governmental initiatives to provide electricity for all, and a surge in several data centers are expected to provide lucrative growth opportunities for the market. However, the high rate of failure of heat-shrink medium voltage cable accessories is expected to hinder the growth of the Saudi Arabia and GCC medium voltage cable accessories industry. The overhead segment was the highest contributor to the market in 2019. The overhead and underground segments collectively accounted for around 81.67% market share in 2019.

The industrialization of developing countries fuels the growth of the overhead segment, thereby enhancing the Saudi Arabia and GCC medium voltage cable accessories market. The COVID-19 outbreak significantly impacted the Saudi Arabia and GCC medium voltage cable accessories market share. End-user industries of Saudi Arabia and GCC medium voltage cable accessories were adversely during the COVID-19 pandemic. Further, there has been an increase in the demand for these cables from the healthcare sector.

## Key Findings of the Study

- In 2017, the cable joints & splice segment accounted for maximum revenue and is projected to grow at a notable CAGR during the forecast period.
- Saudi Arabia contributed the major share in the Saudi Arabia and GCC medium voltage cable accessories market, accounting for the highest revenue share in 2016.

## About Us:

Allied Market Research is a top provider of market intelligence that offers reports from leading technology publishers. Our in-depth market assessments in our research reports take into account significant technological advancements in the sector. In addition to other areas of expertise, AMR focuses on the analysis of high-tech systems and advanced production systems. We have a team of experts who compile thorough research reports and actively advise leading businesses to enhance their current procedures. Our experts have a wealth of knowledge on the topics they cover. Also, they use a variety of tools and techniques when gathering and analyzing data, including patented data sources.
