

CheckSammy Launches Nationwide Solar Panel Recycling Services to Address Sustainability in the Energy Sector

The recycling program focuses on recovering valuable materials from old or broken solar panels, reducing landfill waste, and supporting environmental goals.

DALLAS, TX, UNITED STATES, January 8, 2025 /EINPresswire.com/ -- CheckSammy, a leader in [sustainable disposal solutions](#), has announced the launch of its [solar panel recycling](#) solution. The program addresses the growing need for environmentally responsible solutions in the solar energy sector and serves both commercial and residential solar panel owners, including solar farms, corporate campuses, and homeowners with damaged or outdated panels.

Solar panel recycling offers significant environmental benefits by diverting end-of-life panels from landfills and recovering valuable materials such as e-waste, glass, and metals. CheckSammy's recycling process emphasizes sustainability while ensuring compliance with environmental reporting through detailed diversion data and analytics provided to clients.

Solar panels, primarily composed of crystalline-silicon technology, contain recyclable materials like aluminum, glass, and copper. However, components like polymer layers and silicon solar cells require specialized recycling techniques due to the adhesives used in their construction. CheckSammy's recycling efforts aim to tackle these challenges and maximize material recovery.

The International Renewable Energy Agency estimates that by 2030, the global value of recoverable raw materials from end-of-life panels could reach \$450 million, equivalent to the materials needed for 60 million new panels. CheckSammy's initiative contributes to this circular economy and aligns with broader efforts to reduce landfill usage and capture valuable resources.

With nationwide coverage, CheckSammy's solar panel recycling service offers a comprehensive solution to support the growing demand for sustainable energy practices. It creates a positive environmental impact and enhances transparency for its clients.

About CheckSammy:

CheckSammy is a leader in bulk waste and sustainability logistics, mobilizing a vast network of recycling and reverse logistics facilities across North America. Our proprietary technology, data-

backed techniques, and exclusive partnerships divert materials away from landfills, reducing your waste expenses and improving your diversion rates. Our flexible, on-demand approach provides efficient, scalable solutions for even the most complex recycling and bulk waste needs.
