

Etching Chemicals Market Overview, Business Opportunities, Future Growth, 2032

The global etching chemicals market is projected to reach \$3.0 billion by 2032, growing at a CAGR of 5.9% from 2023 to 2032

WILMINGTON, DE, UNITED STATES, January 9, 2025 /EINPresswire.com/ -- The global [etching chemicals market](#) was valued at \$1.7 billion in 2022 and is projected to reach \$3.0 billion by 2032, registering a CAGR of 5.9% from 2023 to 2032.

The Etching Chemicals Market encompasses a range of chemicals used in the process of etching, a technique primarily employed in industries such as electronics, semiconductor, and automotive for precision engraving, surface texturing, and material removal.

Allied Market Research published a report, titled, "Etching Chemicals Market by Type (Si Etching Solution, Al Etching Solution, Au Etching Solution, Ag Etching Solution, Copper Etching Solution, ITO Etching Solution, Etching Gas, and Others), By Application (Chemical Etching, Photochemical Etching, and Electro-chemical Etching), and By End-Use Industry (Aerospace, Electronic, Medical, Automotive, Construction, and Others): Global Opportunity Analysis and Industry Forecast, 2023-2032."

Prime Determinants of Growth:

The global etching chemicals market is driven by an increase in demand for etching chemicals from the electronic industry and the expansion of the automotive sector. However, numerous etching chemicals are harmful to the environment, which is expected to hamper market growth. The rapid emergence of new technologies, such as flexible electronics, organic electronics, and nanotechnology, opens new avenues for the application of etching chemicals. These

technologies often require innovative etching processes to achieve precise patterns and structures on unconventional substrates.

Key findings of the study:

On the basis of type, the AI etching solution segment is expected to grow at a CAGR of 6.3%, in terms of revenue, during the forecast period.

Depending on the end-use industry, the electronics industry is expected to grow at a CAGR of 5.9 %, in terms of volume, during the forecast period.

On the basis of application, chemical etching has attained a major share of the etching chemical market.

Region-wise, Asia-Pacific garnered a major share in 2022 in terms of revenue.

Leading Market Players:

STELLA CHEMIFA CORPORATION

DAIKIN INDUSTRIES Ltd.

Solvay

ZEON CORPORATION

SACHEM, INC.

KANTO KAGAKU

Mitsubishi Chemical Corporation

ADEKA CORPORATION

Nagase Chemtex Corporation

BASF SE

Access Full Summary: <https://www.alliedmarketresearch.com/etching-chemicals-market-A08230>

The report provides a detailed analysis of these key players in the global etching chemicals market. These players have adopted different strategies, such as new product launches,

collaborations, expansion, joint ventures, agreements, and others, to increase their market share and maintain dominant shares in different regions. The report is valuable in highlighting business performance, operating segments, product portfolios, and strategic moves of market players to showcase the competitive scenario.

The Al etching solution segment to maintain its lead position during the forecast period-

Based on type, the Al etching solution segment accounted for the largest share in 2022, contributing to more than one-fifth of the global etching chemicals market revenue, and is projected to maintain its lead position during the forecast period. Aluminum and its alloys are increasingly prized in engineering for their lightweight durability, which enables energy savings. Etched aluminum components are lightweight and ideal for a range of precision engineering applications owing to the lightweight nature of aluminum. However, the etching gas segment would display the fastest CAGR of 6.4% during the forecast period. Etching gas offers several advantages over other material removal methods, such as chemical etching. For instance, plasma etching is used to remove materials with high selectivity. Only the desired material is removed, and the underlying substrate is not damaged.

The chemical etching segment to maintain its leadership during the forecast period-

Based on application, the chemical etching segment accounted for the largest share in 2022, contributing to nearly half of the global etching chemicals market revenue, and is projected to maintain its leadership during the forecast period. Chemical etching allows for high precision and accuracy in creating intricate patterns, fine details, and complex geometries. It can achieve feature sizes down to a few micrometers or even smaller, making it suitable for producing microelectromechanical systems (MEMS), electronic components, and precision metal parts. On the other hand, the photo chemical etching segment would showcase the fastest CAGR of 6.3% during the forecast period. Companies use photochemical etching as an economical alternative to laser cutting, water jet cutting, punching, and stamping. During mass production, the technique enables easy modifications and adjustments.

The electronics segment to rule the roost by 2032-

Based on end-use industry, the electronics segment accounted for the largest share in 2022, holding nearly one-third of the global etching chemicals market revenue, and is projected to rule the roost by 2032. The same segment would also cite the fastest CAGR of 6.3% from 2023 to 2032. Owing to its increased demand for PCB manufacturing, it is driving the demand for etching chemicals.

Asia-Pacific to maintain its dominance by 2032-

Based on region, Asia-Pacific held the highest market share in terms of revenue in 2022, accounting for nearly half of the global etching chemicals market and is likely to dominate the market during the forecast period. Simultaneously, the same segment would also portray the fastest CAGR of 6.2% during the forecast period. This is attributed to numerous factors, such as the flourishing electronics industry, consistently developing economic status, and strengthening industrialization, which drives the growth of the Asia-Pacific market.

About Us

Allied Market Research (AMR) is a full-service market research and business-consulting wing of Allied Analytics LLP based in Portland, Oregon. Allied Market Research provides global enterprises as well as medium and small businesses with unmatched quality of "Market Research Reports" and "Business Intelligence Solutions." AMR has a targeted view to provide business insights and consulting to assist its clients to make strategic business decisions and achieve sustainable growth in their respective market domain.

We are in professional corporate relations with various companies and this helps us in digging out market data that helps us generate accurate research data tables and confirms utmost accuracy in our market forecasting. Allied Market Research CEO Pawan Kumar is instrumental in inspiring and encouraging everyone associated with the company to maintain high quality of data and help clients in every way possible to achieve success. Each and every data presented in the reports published by us is extracted through primary interviews with top officials from

leading companies of domain concerned. Our secondary data procurement methodology includes deep online and offline research and discussion with knowledgeable professionals and analysts in the industry.
