

Managed Print Services Market Report, 2025 | Size, Share, Growing at a CAGR of 10.3%

Enhanced security, cost savings, plastic waste reduction, and growing big data adoption drive growth in the global managed print services market.

WILMINGTON, DE, UNITED STATES, January 10, 2025 /EINPresswire.com/ -- According to a recent report published by Allied Market Research, the global [managed print services market](#) size was valued at \$27,500 million in 2017 and is projected to reach \$59,709 million by 2025, growing at a CAGR of 10.3% from 2018 to 2025.

Global Managed Print Services Market

OPPORTUNITIES AND FORECASTS, 2018-2025

Global Managed Print Services Market is expected to reach **\$59,709 Million** by 2025.

Growing at a **CAGR of 10.3%** (2018-2025)

Managed Print Services Market

Rise in adoption of big data solutions, initiatives to reduce paper wastage in the workplace, reduced cost of operation, improved productivity, and flexibility to match custom requirements and improved information security, majorly supplement the growth of the MPS market. However, new and strategic partnerships & agreements and recurring cost is expected to hamper the managed print services market growth.

Based on deployment mode, the hybrid cloud-based MPS segment dominated the overall managed print services market share in 2017 and is expected to continue this trend during the forecast period owing to increase in demand for hybrid cloud services among organizations of all sizes that are looking to minimize the cost of printing and move toward new solutions that support mobility, enhance security, and improve business workflows. Also, the segment is expected to witness the highest CAGR during the forecast period owing to numerous benefits, which includes reduced costs, minimized capital expenditure, increased business resilience, reduced it burden, better visibility and control, better service levels, access to technological innovation, and others.

The BFSI industry was the highest contributor to the global managed print services market in 2017 and is projected to remain dominant during the forecast period owing to the wide use of papers for loan applications, new account opening, and other purposes, which leads to high investment cost in resources such as fax machines, printer devices and others. However, the healthcare industry is expected to witness highest growth, as increased adoption of MPS to manage and optimize a high-volume print environment while reducing vulnerabilities with thousands of Devices.

The device management segment dominated the overall managed print services market share in 2017 and is expected to continue this trend during the forecast period, due to increase in adoption of these solutions to optimize the performance of network printing devices and to maximize efficiency and take control of costs. Also, it allows network users to share devices more effectively when printing and also help system administrators to achieve enhanced device management efficiency with the benefit of integrated, centralized control. However, document imaging is expected to witness the highest growth rate during the forecast period owing to rise in demand for image capture for big data handling and analytics in many organizations.

Furthermore, North America dominated the overall managed print services market size in 2017, due to the presence of leading printer/copier manufacturers, favorable government regulations, and rise in number of startups in this region. However, the Asia-Pacific region is expected to grow at the highest CAGR due to continuous rise in the retail & consumer goods startups across the countries such as India, China, and Japan.
