

# Pittsburgh Design & Engineering Showcases Remarkable Client Achievements and Lasting Impact

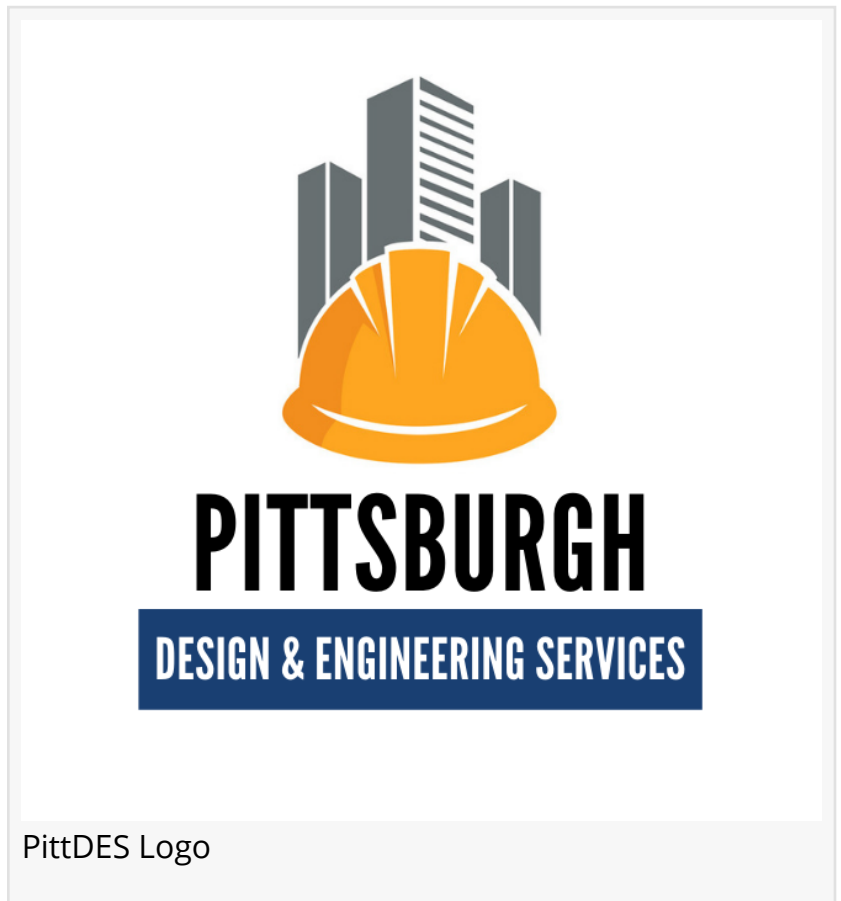

*Trusted Expertise: PittDES Earns Praise for Innovative Structural Solutions and Outstanding Client Satisfaction Across Pittsburgh*

PITTSBURGH, PA, UNITED STATES, January 13, 2025 /EINPresswire.com/ -- Pittsburgh Design & Engineering Services LLC (PittDES) continues to strengthen its reputation as a leading provider of structural engineering solutions in the Pittsburgh area. Known for delivering reliable, innovative, and cost-effective engineering services, PittDES is consistently recognized for its commitment to client satisfaction and quality workmanship.

From resolving complex foundation issues to conducting structural evaluations for first-time homeowners, PittDES offers comprehensive engineering solutions that prioritize safety, efficiency, and long-term value.

## Client Success Stories:

M.G. – Washington, DC: "Pittsburgh Design and Engineering Services is hands-down THE company you need to use for any and all structural engineering needs. I placed a house under contract that had foundation issues and was both nervous and concerned about what the repairs might entail. Firas, the owner, responded to my inquiry within an hour and was very accommodating in scheduling the onsite visit. His knowledge, professionalism, and attention to detail seriously cannot be beaten. He correctly identified and quantified the issues at hand--something two other contractors I had brought out failed to do. I am so happy I spent the extra

money to have him come out, as it has made me much more comfortable in my upcoming purchase and I am now using his observations as points of leverage in my negotiations with the seller. I would highly recommend Pittsburgh Design and Engineering Services to anyone and everyone who is involved with real estate (both commercial and residential) and in need of the expertise of a structural engineer. Firas is one of the most down-to-earth, honest, and knowledgeable professionals I have come across in the greater Pittsburgh area and I look forward to doing business with this firm for years to come."

Firas A

K.K. – Pittsburgh, PA: "Firas was a lifesaver for me when a misinformed home inspector erroneously flagged floor joists as incorrectly installed in a 2 year old Ryan Home. My seller employed Firas to evaluate the situation. Not only was he accommodating with his schedule, he was super helpful in explaining why the inspector was wrong and he was able to relieve any fears from the buyers of the home. I would highly recommend him to anyone needing engineering services."

“

At our firm, we view an engineer as your trusted consultant, working exclusively in your best interests. Your structural issues become our priority & we are here to assist you every step of the way."

*Firas Abdelahad*

C.P. – Harrison City, PA: "Firas was very responsive and willing to work around my busy schedule. I hired a flooring company to install new floors for me and was told by their best guy that I need to add three adjustable supports in my basement. We wanted a second opinion. Firas came over and checked not only the area in question, but my entire basement and first floor. He saved my major damages to my home by making sure that I did not follow poor advice. All said and done, Pittsburgh Design & Engineering Services saved me time, money, and a lot of

future heartache. This has been my first experience with a structural engineer and I did not know what to expect. I have to say that the price was very reasonable and worth every cent for the peace of mind. Please consider Pittsburgh Design & Engineering Services if you have any doubts about the structural well being of your home. You will not regret it."

These testimonials highlight PittDES's core mission: delivering innovative, reliable, and affordable structural engineering solutions with a client-first approach.
