This certificate proudly acknowledges that

Lara Learner

has successfully completed an online, non-credit, collaborative, creative-problem solving challenge and earned a Professional Certification in:

Creating an Innovation and AI Culture

This Certification in Creating an Innovation and AI Culture from Credably.ai and Solvably validates proficiency in creating a systemic innovation mindset, or culture, among the team - using AI while developing human intelligence skills (Innovation Process Management, Strategic Planning, Creativity, Critical Thinking, AI Literacy, Adaptability & Resilience). Recipients have completed a collaborative challenge demonstrating AI application and HI skills crucial for workforce productivity. Through a structured problem-solving process they've created an innovative solution for a real-world challenge. This certification affirms the ability to leverage AI while thinking applying creativity, critical thinking, and other human intelligence skills for innovation in the modern digital landscape.

The online specialization named in this certificate may draw on material from courses taught on-campus, but the included courses are not equivalent to on-campus courses. Participation in this online specialization does not constitute enrolment at this university. This certificate does not confer a University grade, course credit or degree, and it does not verify the identity of the learner.

Successful completion earns a Certification in Creating an Innovation and AI Culture

This performance-based approach to skill development and assessment evaluates participants on their ability to apply knowledge, critical thinking, and AI in real-world scenarios, ensuring measurable outcomes that translate directly into business value. This focus on demonstrating competency through actionable results represents a major shift from traditional training and certification models.

> "The future of corporate success hinges on the ability to scale innovation to the power of AI effectively, while enhancing human potential."
>
> *Angelo Biasi*

Credably.ai's sister product and active learning platform, Solvably, complements the program with a dynamic, team-based environment for collaborative problem-solving, engaging participants in real-time as they navigate every stage of the innovation process—from defining challenges

to delivering results. Together, the two platforms form an integrated ecosystem that develops critical skills, drives innovation, and delivers measurable outcomes.

"The future of corporate success hinges on the ability to scale innovation to the power of AI effectively, while enhancing human potential," said Angelo Biasi, Founder of Solvably and Credably.ai. "By combining the active learning power of Solvably with Credably.ai's performance-based assessment model and measurable insights, we're equipping teams to innovate responsibly and deliver real business value. This program proves that human intelligence and AI can work together to create lasting impact."

The Creating an Innovation and AI Culture certification aligns with Credably.ai's mission to redefine workforce development through real-world problem-solving, as well as authentic and AI-powered assessments across specific competencies of Innovation Process Management, Strategic Planning, Creativity, Critical Thinking, AI Literacy, and Adaptability & Resilience. Each participant's journey culminates in an actionable deliverable and shareable ePortfolio, offering verifiable proof of their advanced skills and achievements.
