

# Smile Concepts Confirm Continuing Strong Demand for Porcelain Veneers Procedure In Sydney

*Sydney based Smile Concepts confirmed in a recent interview with Metro Cities Media of the growing enquiry levels for porcelain veneers.*

SYDNEY, NSW, AUSTRALIA, January 14, 2025 /EINPresswire.com/ -- [Smile concepts](#), with over 40 years combined

experience, and considered one of the best dentists in Sydney has built a strong reputation in providing a full range of dental services from a highly qualified and dedicated team. Their mission statement is to build authentic and trusting relationships with clients, at the same time educate them of the wide range of choices available. Porcelain veneers is one of those treatments and is growing in demand.

Veneers are thin, yet strong tooth-coloured porcelain shells that are bonded on to the front of teeth. They have a "life like" appearance with the strength, beauty, and durability that only a [porcelain veneer procedure](#) can create.

Dr Manish Shah, Principal Dentist with Smile Concepts said, "Porcelain veneers can dramatically improve crooked, crowded, chipped and gappy smiles. The veneers that we use in this procedure are of the highest quality and specially designed for the work we do. A big benefit of them, unlike crowns, is that they typically do not require significant erosion of the existing tooth they are being applied to."

Metro Cities Media's investigation found that due to the advanced skills and technology at Smile Concepts, mild preparation is only required and they don't have to cut away a lot of your teeth to place the porcelain veneer on to the tooth.

"Due to the fast and dramatic results that porcelain veneers can produce, combined with the minimal impact on the patient's teeth, we are seeing continuing strong demand for our sought-after porcelain veneer procedures" said Dr Manish Shah
