Message from the Author

"My book's goal is to show that programming is fun and all about creativity. As a teen, I dreamed of being a rock musician and playing in a band. But life led me to become a developer instead. And honestly, it's just as fulfilling and way easier than being a rock star. Plus, working with other developers feels a lot like playing in a band. With my book, I hope to connect with other programmers to exchange ideas."
