

ColorMax Cameras from Cortex Security for amazing, vivid color video at night

New technology from Cortex Security that keeps video images in full color and high shutter speed.

TAMPA, FL, UNITED STATES, January 15, 2025 /EINPresswire.com/ -- The capabilities of [security cameras](#) are expanding as technology continues to evolve. Cortex Security has recently introduced their latest development in the industry: IP security cameras that are specifically engineered for low-light environments. Improvements in hardware technology such as large format image sensors and specialized optics have made this possible. Professionals and consumers who require advanced alerts and high-definition detail at night will find these cameras to be an excellent choice.

The latest IP security cameras from Cortex® are equipped with ColorMax®, a state-of-the-art technology that ensures that even in low-light conditions, the footage is clear and detailed. This is a game-changing development for professionals in the fields of law enforcement, security, and enterprises that operate at night. These cameras provide a substantial advantage in the identification and prevention of potential hazards due to their capacity to capture high-quality video in poor lighting.

Cortex ColorMax Technology

Cortex ColorMax Technology for Commercial projects

The sophisticated alert system of these cameras is one of their most remarkable attributes. The cameras are equipped with facial recognition and human detection technology, which enables them to send real-time alerts to users when suspicious activity is detected. This feature is particularly beneficial for householders and businesses that wish to maintain a vigilant watch over their property at all times. These cameras are a versatile and valuable asset to any security system, as they can be customized to meet the unique requirements of each user. Additionally, the advanced notifications are highly customizable.

Geoff, spokesperson for Cortex, expressed enthusiasm for the introduction of the company's latest IP security cameras to the market. "We understand the significance of advanced alerts and high-quality footage, particularly in low-light conditions." Our cameras are engineered to satisfy the requirements of professionals and consumers who necessitate exceptional security measures. We are certain that these cameras will have a substantial impact on the industry and offer our consumers increased awareness and protection.

The new IP security cameras from Cortex are now available in stock, with a variety of lens and mounting options to choose from. They are certain to become a necessity for professionals and consumers who prioritize security due to their advanced technology and remarkable features.
