

# RefillGenie Service Now Available 24/7 in 45 US States

*Leading telehealth platform expands its prescription refill services across America, providing crucial medication access to patients when they need it most.*

JERSEY CITY, NJ, UNITED STATES, January 15, 2025 /EINPresswire.com/ -- [RefillGenie](#), a pioneering telehealth company specializing in medication refills, has announced the expansion of its prescription refill services to 45 states across America, including Washington D.C., with 24/7 availability. This significant expansion addresses the critical need for [accessible medication refills](#), particularly for patients managing chronic conditions.

"We founded RefillGenie because we witnessed too many preventable health emergencies caused by medication lapses," says Dr. Stephen Kelly, Founder of RefillGenie. "Our text-based service ensures that anyone can access their life-saving medications when needed, whether they're between doctors, insurance plans, or facing unexpected circumstances."

The service operates through a streamlined process designed for patient convenience, with most refills processed within 12 hours. RefillGenie's expansion comes at a crucial time when continuous access to prescription medications remains a significant healthcare challenge for many Americans.

RefillGenie's user-friendly process includes:

- Text-based prescription refill requests.
- Same-day service for chronic medications.
- Free lab orders and interpretations when necessary.

Recent patient experiences highlight the platform's effectiveness. Ali M., a recent user, shares, "Part of me was worried that all the five star reviews were too good to be true, especially since I reached out after 7 pm. But it only took 10 minutes to hear from a team member and my prescription was called in within two hours. This relieved so much stress knowing I could go to

the pharmacy the next day and have medication on hand in case my medical issue flared up over Christmas and during a time when my providers may be unavailable."

The company's services are particularly beneficial for individuals who:

- Have lost their health insurance
- Are in between doctors
- Travel frequently
- Have difficulty scheduling appointments during regular clinic hours

The service prioritizes patient safety while maintaining accessibility. While RefillGenie can assist with many common prescriptions, certain medications such as controlled substances, sedatives, and those requiring close monitoring are excluded. When necessary, the company provides complimentary lab orders and result interpretations to ensure safe prescription refills.

"Really needed prescription filled to get me thru ... life savers," notes Rita M., emphasizing the platform's crucial role in medication continuity. Another patient, Julie D., adds, "So thankful for this service. Super fast, affordable, safe, and convenient. I've had nothing but great experiences."

As the healthcare landscape continues to evolve, RefillGenie's expansion represents a significant step towards ensuring continuous care for patients across the United States. The company's focus on accessibility, safety, and efficiency positions it as a valuable resource in the ongoing effort to improve healthcare outcomes.

RefillGenie emphasizes that their service is designed to complement, not replace, primary care relationships. The platform serves as a bridge during healthcare transitions, helping prevent dangerous lapses in medication schedules.

RefillGenie is not an online pharmacy. It is a telehealth platform where customers can interact with a board-certified physician via encrypted text chat; if approved, the physician sends a prescription for a refill of an existing medication. Proof of a previous prescription is required. To learn more about RefillGenie's services, call +1 (929)-274-3052. ###

About RefillGenie Inc.

The physician founders of RefillGenie (<https://refillgenie.com/about-us/>) were tired of seeing

patients suffer from strokes and heart attacks simply because they were unable to refill their blood pressure medication. For that reason, they created a simple, text-based service to ensure anyone can access their life-saving medications, even when in-between doctors or insurance plans.

#### Note to Editors

- RefillGenie is a telehealth company that provides medication refill services to patients in 41 states across the USA.
- The company was founded by Dr. Stephen Kelly and is headquartered in Jersey City, New Jersey.
- RefillGenie's mission is to remove barriers to medication access and ensure patients can easily manage their health, even during times of uncertainty or transition.
- The company offers a user-friendly, text-based service with transparent pricing and direct communication with licensed physicians.
- RefillGenie does not intend to replace primary care doctors. It serves as a temporary resource to bridge gaps in care and prevent complications from conditions like diabetes and hypertension.
